The ascending arousal system and its impact on cognition

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op vrijdag 6 juni 2025
klokke 10:00 uur

door
Beth Lloyd
geboren te Cardiff
in 1991

Promotor:	Prof.dr. Sander T. Nieuwenhuis
Co-promotor:	Dr. Franz Wurm
Promotiecommissie:	Prof.dr. Hanneke E. Hulst (Wetenschappelijke Directeur Psychologie / voorzitter) Prof.dr. Serge A.R.B. Rombouts Dr. Judith Schomaker Prof.dr. Birte U. Forstmann (University of Amsterdam) Dr. Heidi Jacobs (Maastricht University)

For Mam and Dad

Contents

Chapter 1	Introduction	9
Chapter 2	Pupil size reflects activation of subcortical ascending arousal system nuclei during rest	23
Chapter 3	Short-term transcutaneous vagus nerve stimulation increases pupil size but does not affect EEG alpha power: A replication of Sharon et al. (2021, Journal of Neuroscience)	55
Chapter 4	Non-invasive vagus nerve stimulation and the motivation to work for rewards: A replication of Neuser et al. (2020, Nature Communications)	71
Chapter 5	Pupil-linked arousal counteracts the positive effects of reward anticipation on incidental memory encoding	87
Chapter 6	Subcortical nuclei of the human ascending arousal system encode anticipated reward but do not predict subsequent memory	107
Chapter 7	The effect of reward-induced arousal on the success and precision of episodic memory retrieval	133
Chapter 8	Discussion	153
Appendix A	Supplementary Figures for Chapter 2	163
Appendix B	Supplementary Figures for Chapter 3	169
Appendix C	Supplementary Results for Chapter 4	175
Appendix D	Supplementary Figures for Chapter 6	179
