**NEUROSURGICAL MANAGEMENT OF BRAIN
METASTASES IN THE ERA OF MODERN
ONCOLOGY**

Alexander Frans Christiaan Hulsbergen

Neurosurgical management of brain metastases in the era of modern oncology

The research described in this thesis was carried out at the Department of Neurosurgery of the Brigham's and Women's Hospital, Boston, United States of America, at the Department of Neurosurgery of the University Medical Center Utrecht, Utrecht, The Netherlands, and at the Department of Neurosurgery of the Leiden University Medical Center, Leiden, The Netherlands.

NEUROSURGICAL MANAGEMENT OF BRAIN METASTASES IN THE ERA OF MODERN ONCOLOGY

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens het besluit van het college voor promoties

te verdedigen op donderdag 26 juni 2025

door

Alexander Frans Christiaan Hulsbergen

geboren te Nijmegen

in 1995

Promotores:

Prof. dr. mr. M.L.D. Broekman

Prof. dr. W. C. Peul

Promotiecommissie:

Prof. dr. M. J. B. Taphoorn, neuro-oncoloog

Prof. dr. P. E. Postmus, longarts

Prof. dr. J. J. C. Verhoeff, radiotherapeut (Amsterdam UMC)

Prof. dr. P. A. J. T. Robe, neurochirurg (UMC Utrecht)

Dr. D. Cohen, patholoog

TABLE OF CONTENTS

Chapter 1	Introduction and outline of thesis	9
	<i>General introduction</i>	10
	<i>Epidemiology, origins, and molecular profiles of BMs</i>	11
	<i>Prognosis and outcomes</i>	13
	<i>Neurosurgery for brain metastases in the era of modern oncology: outline of this thesis</i>	14
	<i>References</i>	16
PART I	GENERAL OVERVIEW	21
Chapter 2	Multidisciplinary management of brain metastases in the era of modern oncology	23
	<i>In preparation for submission</i>	
PART II	BREAST CANCER BRAIN METASTASES AND THE ROLE OF NEUROSURGERY	45
Chapter 3	Subtype switching in breast cancer brain metastases: a multicenter analysis	47
	<i>Neuro-Oncology 22(8), 1173–1181, 2020</i>	
Chapter 4	Systemic therapy following craniotomy in patients with a solitary breast cancer brain metastasis	71
	<i>Breast Cancer Research and Treatment 180:147–155, 2020</i>	
Chapter 5	Prognostic value of brain metastasis free interval in patients with breast cancer brain metastases	87
	<i>World Neurosurgery 128, e157-e164, 2019</i>	
PART III	THE INTERPLAY BETWEEN IMMUNOTHERAPY AND LOCAL TREATMENT FOR BRAIN METASTASES	103
Chapter 6	Programmed death receptor ligand one expression may independently predict survival in non-small cell lung carcinoma brain metastases patients receiving immunotherapy	105
	<i>International Journal of Radiation Oncology Biology Physics 108(1):258-267, 2020</i>	
Chapter 7	Immune-related adverse events after surgery or radiotherapy as a novel prognostic factor in brain metastasis patients	127
	<i>In preparation for submission</i>	

Chapter 8	The combined use of steroids and immune checkpoint inhibitors in brain metastasis patients: a systematic review and meta-analysis <i>Neuro-Oncology 23(8), 1261–1272, 2021</i>	143
PART IV	OPEN QUESTIONS IN NEUROSURGERY FOR BRAIN METASTASES	175
Chapter 9	Impact of extent of resection on survival in brain metastasis: an analysis of 867 patients <i>Accepted into Neurosurgery on 27-02-2025</i>	177
Chapter 10	Survival prediction after neurosurgical resection of brain metastases: a machine learning approach <i>Neurosurgery 91:381–388, 2022</i>	195
Chapter 11	Neurosurgical resection for locally recurrent brain metastasis <i>Neuro-Oncology 23(12), 2085–2094, 2021</i>	211
Chapter 12	Summary and discussion	235
	<i>A changing treatment landscape for breast cancer brain metastases</i>	236
	<i>Interactions between immunotherapy, neurosurgical resection and radiosurgery</i>	237
	<i>The era of modern oncology: implications for surgical strategies</i>	238
	<i>The future of evidence-based brain metastasis treatment</i>	239
	<i>References</i>	243
Chapter 13	Samenvatting in het Nederlands	247
	Acknowledgements	254
	Curriculum Vitae	256
	List of Publications	258
