Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof.dr.ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op dinsdag 1 juli 2025

klokke 10:00 uur

door

Sietse Emiel Stefan Terpstra

geboren te Rotterdam

in 1993

**Promotores:**

Prof. dr. M. Kloppenburg

Prof. dr. F.R. Rosendaal

**Leden promotiecommissie:**

Prof. dr. R.H.H. Groenwold

Prof. dr. E.H.G. Oei (Erasmus MC)

dr. M. Reijnerse

dr. J. Runhaar (Erasmus MC)

# CONTENT

## Part I: Introduction to osteoarthritis and its treatment

|           |                                                                         |    |
|-----------|-------------------------------------------------------------------------|----|
| Chapter 1 | General introduction                                                    | 9  |
| Chapter 2 | The management of hand osteoarthritis: the rheumatologist's perspective | 29 |

## Part II: Osteoarthritis and physical activity

|           |                                                                                                                                                                         |     |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 3 | Validation of the SQUASH physical activity questionnaire using accelerometry: the NEO study                                                                             | 53  |
| Chapter 4 | The association of clinical and structural knee osteoarthritis with physical activity in the middle-aged population: The NEO study                                      | 71  |
| Chapter 5 | Hand osteoarthritis is associated with limitations in paid and unpaid work participation and related societal costs: the HOSTAS cohort                                  | 89  |
| Chapter 6 | The longitudinal association of hand osteoarthritis with paid and unpaid work restrictions and related societal costs: the Hand Osteoarthritis in Secondary Care cohort | 111 |

## Part III: Structural disease course and associated risk factors

|           |                                                                                                                                                                    |     |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 7 | Bone marrow lesions and collateral ligament lesions are associated in interphalangeal joints with osteoarthritis; the Hand OSTeoArthritis in Secondary care cohort | 133 |
| Chapter 8 | Severity and progression of structural hand OA is not associated with progression of structural knee OA: The IMI-APPROACH cohort                                   | 149 |

## Part IV: Summary and appendices

|              |                                             |     |
|--------------|---------------------------------------------|-----|
| Chapter 9    | Summary and discussion                      | 171 |
| Chapter 10   | Summary in Dutch (Nederlandse samenvatting) | 187 |
| Appendix I   | List of publications                        | 201 |
| Appendix II  | Curriculum vitae (in Dutch)                 | 205 |
| Appendix III | Acknowledgements (in Dutch)                 | 209 |
