Mandarin Chinese  
Evidence from Chinese Disyllabic  
Compound Words

Proefschrift

ter verkrijging van  
de graad van doctor aan de Universiteit Leiden,  
op gezag van rector magnificus prof. dr. ir. H. Bijl,  
volgens besluit van het college voor promoties  
te verdedigen op woensdag 2 juli 2025  
klokke 14.30 uur

door

Jiaqi Wang

geboren te Tianjin, China  
in 1997

Promotores: Prof. dr. N.O. Schiller

Prof. dr. C.C. Levelt

Promotiecommissie: Prof. dr. J. Grijzenhout

Prof. dr. Y. Chen

Prof. dr. A.G. Lewis (City University of Hong Kong)

Prof. dr. M. Yan (Macau University)

<b>Publications</b> .....	<b>1</b>
<b>Chapter 1 General introduction</b> .....	<b>1</b>
1.1 Background.....	1
1.2 Language production .....	2
1.3 The representations of compounds .....	4
1.3.1 The full-listing hypothesis .....	5
1.3.2 The decompositional hypothesis.....	7
1.3.3 The lemma representation of compounds.....	9
1.4 Electroencephalographical evidence of compounds production .....	11
1.5 The current study .....	13
<b>Chapter 2 Morphological encoding in language production: Electrophysiological evidence from Mandarin compound words</b>	<b>17</b>
2.1 Introduction .....	18
2.1.1 Full-listing hypothesis .....	22
2.1.2 Decompositional hypothesis.....	23
2.1.3 Long-lag paradigm.....	25
2.1.4 Electrophysiological evidence .....	26
2.1.5 The position effect .....	28
2.1.6 The goal of the present study .....	29
2.2 Methodology.....	30
2.2.1 Participants.....	30

2.2.2 Materials .....	31
2.2.3 Design .....	33
2.2.4 Procedure .....	34
2.2.5 Electrophysiological recording and data processing .....	36
2.3 Data analysis.....	37
2.3.1 Behavioral and EEG data exclusion .....	37
2.3.2 Behavioral data analysis .....	37
2.3.3 EEG data analysis .....	40
2.4 Discussion.....	46
Appendix .....	54
2.A Experimental stimuli.....	54
2.B EEG electrode montage.....	56
2.C Model parameters: response times .....	57
2.D Model parameters: N400.....	58
<b>Chapter 3 Word and morpheme frequency effects in naming</b>	
<b>Mandarin Chinese compounds: More than a replication.....</b>	<b>59</b>
3.1 Introduction .....	60
3.1.1 The representation of morphologically complex words ..	61
3.1.1.1 Production of complex words.....	61
3.1.1.2 Comprehension of complex words.....	62
3.1.2 The representation of compound words.....	64
3.1.2.1 The decompositional model .....	65
3.1.2.2 The full-listing model .....	67
3.1.3 The current study .....	69
3.2 Methodology.....	70
3.2.1 Participants.....	70

3.2.2 Materials .....	71
3.2.3 Design .....	74
3.2.4 Procedure .....	75
3.2.5 Electrophysiological recording and data processing .....	76
3.3 Data analysis and results.....	77
3.3.1 Behavioral and EEG data exclusion .....	77
3.3.2 Behavioral data analysis .....	78
3.3.3 EEG data analysis .....	80
3.4 Discussion.....	86
3.5 Conclusion .....	89
Appendix .....	92
3.A Experimental stimuli .....	92
3.B EEG electrode montage.....	97
3.C Model parameters: response times .....	98
3.D Model parameters: N400 component.....	100
<b>Chapter 4 The effect of synonym distractors on naming Mandarin compound words.....</b>	<b>101</b>
4.1 Introduction .....	101
4.1.1 Two-stage model.....	102
4.1.2 Hybrid lemma account.....	105
4.1.3 Effects of synonym distractors on lexical processing....	107
4.1.4 The characteristics of Mandarin .....	110
4.1.5 The present study .....	112
4.2 Methodology.....	113
4.2.1 Participants.....	113
4.2.2 Materials .....	114

4.2.3 Design and Procedure .....	115
4.3 Data analysis.....	117
4.4 Discussion.....	119
4.5 Conclusion.....	126
Appendix .....	127
4.A Experimental stimuli .....	127
4.B Model parameters: reaction times .....	130
<b>Chapter 5 Concreteness effect of constituents in Mandarin compounds .....</b>	<b>131</b>
5.1 Introduction .....	131
5.2 Methodology.....	136
5.2.1 Participants.....	136
5.2.2 Materials .....	137
5.2.3 Design .....	140
5.2.4 Procedure .....	141
5.3 Data analysis and results.....	142
5.3.1 Behavioral data exclusion.....	142
5.3.2 Behavioral data analysis .....	142
5.4 Discussion and conclusion.....	144
Appendix .....	150
5.A Experimental stimuli .....	150
<b>Chapter 6 General discussion.....</b>	<b>153</b>
6.1. Discussion of chapter findings .....	153
6.2 Theoretical implications .....	162
6.3 Methodological implications .....	167
6.4 Limitations and directions for future research.....	169

## Acknowledgements

From January 2021 to July 2025, I spent over four years completing my PhD journey. I still remember the first day I arrived in the Netherlands – a country entirely unfamiliar to me. Looking back, my time here has been filled with laughter and tears, moments of doubt and clarity, self-reflection, and growth. This journey has been one of the most transformative experiences of my life, and I will forever cherish every memory.

This thesis is the culmination of my PhD life in the Netherlands. It would not have been possible without the unwavering support and guidance of my supervisors. First and foremost, I extend my deepest gratitude to Prof. Dr. Niels O. Schiller, Prof. Dr. Claartje Levelt, and Dr. Rinus G. Verdonshot. Niels, your encouragement and mentorship have been invaluable – without you, this thesis would never have reached completion. Claartje, thank you for stepping in during my fourth year; your support helped me navigate countless challenges. Rinus, I am deeply grateful for your patience and insightful feedback on my experiments.

I would also like to express my appreciation to those who supported me during my research visits: Prof. Dr. Peter Hagoort and the NBL group in Nijmegen, Prof. Dr. Yanchao Bi for hosting me in Beijing, and the wonderful lab members at City University of Hong Kong for their constructive discussions. A special thanks to Prof. Dr. Xiufeng Zhao,

## II | Acknowledgements

my postgraduate supervisor, whose encouragement and guidance set me on this path and continued to inspire me throughout my PhD.

To my dear friends – you have been my greatest treasure in the Netherlands. Kexin, thank you for being my constant companion, confidant, and travel partner. Our adventures across the Netherlands and beyond are memories I will always hold close. Mengdi Zhu, Zheyu Shang, Ye Jiang, Xiaoqiang Meng, and Xinyuan Chen – our shared moments, deep conversations, gym sessions, or spontaneous trips, have given me strength and joy. A heartfelt thanks to Wenyu Wan and the Leiden Student Union members – Ying Yin, Roujia Feng, Wei Fang, Yao Yao, and others – for making my time here so vibrant.

To my lab mates – Sarah von Grebmer zu Wolfsthurn, Ruixue Wu, Yufang Wang, Yanan Wang, Jin Wang, Qi Zhang, Ziheng Cheng, Xuan Tang, and the rest of the team – thank you for your collaboration, feedback, and camaraderie. Sarah, your help in data collection and data analysis was indispensable. Ruixue, our travels to Lisbon, Paris, and beyond, as well as your unwavering support, mean a lot to me. My wonderful office mates – Qing Yang, Zhen Li, Elisabeth Kerr, Ou Ourilige, Ruoyu Shi, Jian Sun, and Jiahui Liang – you made the office feel like home.

To my LUCL colleagues - Jiang Wu, Xinyi Wen, Tingting Zheng, Renfei Bai, Xin Li, Mathew Sung, Jiaxin Sun, Meipan Yang, Jingtian Shi, and many more – thank you for the shared meals, board game nights, and countless coffee breaks. Jiang, you are talented in cooking

### Acknowledgements | III

and Dutch learning, thanks for the delicious food and for having Dutch class together. A special thanks to Louise Friis, Hester Groot, Olga Nozdracheva, Perscilla Lam, Andrew Wigman and others for making the Hortus and the North End pub such welcoming spaces. Yu-Min and Marcel, our Dutch practice sessions were both fun and fruitful – *mijn Nederlands is zeker beter geworden dankzij jullie!*

To the strangers who greeted me with a warm “Goedemorgen” in Leiden, Nijmegen, Amsterdam, Den Haag, Utrecht, Delft, Texel, Maastricht and beyond – your kindness made the Netherlands feel like home.

Above all, I owe everything to my family – my beloved parents, sister, and brother. Your unconditional love and support carried me through the toughest times. Though I missed many family moments while abroad, I carry you all in my heart.

Finally, I draw inspiration from *Arya Stark* from *Game of Thrones* – a “nobody” who grew stronger through adversity. To my “Jaquen H’ghar” – thank you for teaching me to see the world differently, for the Vermeer exhibition, for the starry nights watching Aurora in Leiden, for the walks through various Dutch cities, for watching movies and playing video games together and for the unwavering support during my darkest days. Our travels – from Texel to Antwerp, Nijmegen to the Leiden coast – are memories I will forever treasure. Three-quarters of my PhD life and its outcomes should be credited to “nobody” and “Jaquen”. I felt lucky to have you in my life. And to myself – thank you for persevering.

#### IV | Acknowledgements

This PhD has been more than an academic journey; it has shaped my resilience, clarified my beliefs, and taught me the value of persistence. It is only the beginning.

The Dutch summer wind (and gloomy winter days as well) will always carry these memories, and I will carry them with me, always.
