The thesis presented in this thesis was conducted at the Department of Anatomy & Embryology of the Leiden University Medical Center, the Netherlands. It was supported by the following grants: the European Union's Horizon 2020 research and innovation program 494 under grant agreement No. 812954; the Netherlands Organ-on-Chip Initiative, an NWO 495 Gravitation project (024.003.001) funded by the Ministry of Education, Culture and Science of the 496 government of the Netherlands; the LymphChip project with project number NWAORC 2019 497 1292.19.019 of the NWA research program "Research on Routes by Consortia (ORC)," which is funded 498 by the Netherlands Organisation for Scientific Research (NWO); the EU/EFPIA/JDRF INTERNATIONAL 499 Innovative Medicines Initiative 2 Joint Undertaking imSAVAR grant no 853988; the Novo Nordisk 500 Foundation Center for Stem Cell Medicine that is supported by a Novo Nordisk Foundation grant 501 (NNF21CC0073729).

Modeling vascular inflammation with immune cell-vessel crosstalk in hiPSC-derived 3D vessels-on-chip

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 2 juli 2025
klokke 13:00 uur

door

Merve Bulut

geboren te Yenimahalle, Turkije
in 1993

Promotor Prof. dr. C.L. Mummery

Co-Promotor Dr. V.V. Orlova

Promotiecommissie Prof. dr. P.S. Hiemstra

Prof. dr. M.J.T.H. Goumans

Dr. F.P.G. Lebrin

Prof. dr. P.L. Hordijk (VU Medical Center Amsterdam)

Prof. dr. A.D. van der Meer (University of Twente)

To the restless drive
to search,
to question,
to evolve.

Index

Chapter 1	General introduction	9
Chapter 2	Three-dimensional vessels-on-a-chip based on hiPSC-derived vascular endothelial and smooth muscle cells	29
Chapter 3	3D hiPSC-derived vessels-on-chip reveal insights into inflammatory responses in healthy and disease states	79
Chapter 4	3D hiPSC-derived vessels-on-chip recapitulate inflammatory responses in Hereditary Hemorrhagic Telangiectasia-1 (HHT1)	119
Chapter 5	3D hiPSC-derived vessel-on-chip model to investigate perivascular macrophage function	143
Chapter 6	Vascularization of organoid microenvironments: Perfusable networks for organoid growth and maturation	171
Chapter 7	General discussion and future perspectives	185
Appendix	Summary	204
	Nederlandse samenvatting	206
	Curriculum vitae	208
	List of publications	209
	Acknowledgments	210
