Guardians of the gut

Harnessing bioinformatics to study the gut microbiome and faecal
microbiota transplantation in intestinal disorders

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op vrijdag 10 oktober 2025
klokke 10.00 uur

door

Sam Nooij
geboren te Amsterdam
in 1990

Promotor

Prof. Dr. A.C.M. Kroes

Copromotores

Dr. E.M. Terveer

Dr. Q.R. Ducarmon

Leden promotiecommissie

Prof. Dr. E.J. Kuijper

Dr. G.F. Zeller

Dr. A.C. Schürch (Universitair Medisch Centrum Utrecht)

Prof. Dr. W. van Schaik (University of Birmingham, Verenigd Koninkrijk)

Printing of this thesis was financially supported by the Leiden University Library (UBL), and the Netherlands Society of Medical Microbiology (NVMM) and the Royal Netherlands Society for Microbiology (KNVM).

"Dubium sapientiae initium."

René Descartes (1596-1650)

Vertaling:

"Twijfel is het begin van wijsheid."

Table of contents

Chapter 1	General introduction	9
Part 1: Concomitant microbiota impacts after faecal microbiota transplantation for recurrent <i>Clostridioides difficile</i> infections		
Chapter 2.1	Faecal microbiota transplantation influences procarcinogenic <i>Escherichia coli</i> in recipient recurrent <i>Clostridioides difficile</i> patients	27
Chapter 2.2	Rational donor selection, Reply	49
Chapter 3	Long-term beneficial effect of faecal microbiota transplantation on colonisation of multidrug-resistant bacteria and resistome abundance in patients with recurrent <i>Clostridioides difficile</i> infection	55
Part 2: Microbiota alterations after faecal microbiota transplantation for ulcerative colitis		
Chapter 4	Fecal Microbiota Transplantation engraftment after budesonide or placebo in patients with active ulcerative colitis using pre-selected donors: a randomized pilot study	91
Chapter 5	Dynamics of Gut Microbiota after Fecal Microbiota Transplantation in Ulcerative Colitis: Success Linked to Control of <i>Prevotellaceae</i>	121
Chapter 6	Ecological resilience in ulcerative colitis: Microbial dynamics of donor and resident species in a longitudinal fecal microbiota transplantation study	145
Part 3: Global distribution and genome biology of gut bacterium <i>Ruminococcus gnavus</i>		
Chapter 7.1	Metagenomic global survey and in-depth genomic analyses of <i>Ruminococcus gnavus</i> reveal differences across host lifestyle and health status	169
Chapter 7.2	Draft and complete genome sequences of 17 <i>Streptococcus</i> species	205
Chapter 8	General Discussion	211
Appendix	Nederlandse samenvatting	241
