*Het leven is heerlijk, het leven is mooi
Maar vlieg uit in de lucht en kruip niet in een kooi
Mens, durf te leven
Je kop in de hoogte, je neus in de wind
En lap aan je laars, hoe een ander het vindt
Hou een hart vol van warmte en van liefde in je borst
Maar wees op je vierkant meter een vorst
Wat je zoekt, kan geen ander je geven
Mens, durf te leven*

Dirk Witte (1917)

TABLE OF CONTENT

Chapter 1	General introduction and thesis outline	9
Chapter 2	Endothelial barrier function and leukocyte transmigration in atherosclerosis	41
Chapter 3	Junctional F-actin regulates size-selective permeability of the vascular endothelial barrier	73
Chapter 4	RhoGEF Trio-induced strengthening of the endothelial barrier regulates paracellular, but not transcellular migration of immune cells	107
Chapter 5	Myeloid PHD2 conditional knockout improves intraplaque angiogenesis and vascular remodeling in a murine model of venous bypass grafting	113
Chapter 6	Preoperative methionine restriction induces perivascular adipose tissue browning and improves vein graft remodeling in male mice	143
Chapter 7	CD137 signaling modulates vein graft atherosclerosis by modulating T cell activation and intraplaque angiogenesis	191
Chapter 8	Pharmacological PARP1 inhibition attenuates intimal hyperplasia and improves post-interventional vascular remodeling	235
Chapter 9	Blockade of YAP mechano-activation prevents neointima formation and adverse remodeling in arterialized vein grafts	267
Chapter 10	General summary and future perspectives	311
Appendices	Nederlandse samenvatting en toekomstperspectieven	328
