Body composition, nutritional status and clinical outcomes in end-stage liver disease

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. Ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op woensdag 29 oktober 2025
klokke 10.00 uur

door

Daphne Bot
geboren te Gorinchem
in 1993

Promotor: Prof. dr. B. van Hoek

Copromotor: Dr. M. E. Tushuizen

Promotiecommissie:
Prof. dr. I.P.J. Alwayn
Prof. dr. M.J. Coenraad
Prof. dr. ir. P.J.M. Weijs, Vrije Universiteit Amsterdam
Dr. M.J.E. Campmans-Kuijpers, Universiteit Groningen
Dr. P.W.J. Maljaars

Table of contents

Part I	Introduction	
	Chapter 1	General introduction and outline of the thesis 11
Part II	Impact of body composition on patients with end-stage liver disease	
	Chapter 2	Both muscle quantity and quality are predictors of waiting list mortality in patients with end-stage liver disease 21
	Chapter 3	Association between skeletal muscle index prior to liver transplantation and one-year mortality post-transplant: A retrospective cohort study 43
	Chapter 4	Skeletal muscle mass in patients with end-stage liver disease: not only muscle size but especially muscle quality matters in relation to physical fitness 67
Part III	Current use of nutritional assessment tools	
	Chapter 5	Nutritional assessment in patients with chronic liver disease – current accessibility and implementation 87
Part IV	Energy requirements in patients with end-stage liver disease	
	Chapter 6	For dietary advice in end-stage liver cirrhosis resting metabolic rate should be measured, not estimated 103
	Chapter 7	Energy balance and late evening snacks in relation to skeletal muscle index and muscle radiation attenuation in patients screened for liver transplantation 109

Part V	Interventions to improve body composition	
Chapter 8	Systematic review: Improving body composition in patients with end-stage liver disease	127
Chapter 9	Semaglutide for the treatment of post transplantation diabetes mellitus in patients following liver transplantation is safe and effective	171
Part VI	Thesis overview	
Chapter 10	Summary, general discussion and future perspectives	179
Appendices	Nederlandse samenvatting	192
	List of publications	195
	Dankwoord	196
	Curriculum vitae	198
