This work is partially financed by BASF SE

Front cover: *Capsicum annuum*, Pepper, epithelial cells with nuclei showing GFP or Cherry fluorescent signal.

Cover design: Ivo Gariboldi

Printing: Ridderprint, www.ridderprint.nl

Resolving plant transformation recalcitrance by *Agrobacterium*-mediated protein translocation

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 28 oktober 2025
klokke 13:00 uur

door

Ivo Gariboldi
geboren te Leiden, Nederland
in 1990

Promotor

Prof. dr. R. Offringa

Co-promotor:

Dr. M.H. Stuiver, BASF Innovation Center, Zwijnaarde

Promotiecommissie:

Prof. dr. A.H. Meijer

Prof. dr. J. Memelink

Dr. S. Irmisch

Dr. A. C. Vergunst, University of Montpellier

Prof. dr. H.W. Vriezen, Maastricht University

Table of contents

Chapter 1	p.07
The role of <i>Agrobacterium</i> -mediated protein translocation in plant development and defense modulation	
Chapter 2	p.37
A generic detection system for <i>Agrobacterium</i> -mediated DNA and protein translocation to plant cells	
Chapter 3	p.69
The dynamics of <i>Agrobacterium</i> -mediated protein translocation to plant cells	
Chapter 4	p.107
Tackling plant transformation recalcitrance by <i>Agrobacterium</i> -mediated protein translocation	
Summary	p.134
Samenvatting	p.137
Curriculum vitae	p.141
