ACKNOWLEDGEMENTS

I am thankful to everyone who helped me take up, go through, and finally complete my PhD journey. It has been a hard, seemingly never-ending process, but also a truly beautiful and rewarding one, thanks to the people I encountered.

This research was made possible by the people I met in Singapore, Indonesia, Malaysia, Burma, and the Philippines. Those who shared their experiences, aspirations, and concerns with me, and who allowed me to participate in their lives, form the very heart of this thesis. I am deeply grateful to all who trusted me with not only their hopes but also their doubts and vulnerabilities. It was an incredible privilege, one I will never regard lightly. I especially thank everyone at The Accelerator in Singapore for their persistent patience and generosity. The kindness I experienced in my fieldwork remains a model for how I try to live my life. Forever indebted.

I owe much to my supervisors, Peter Pels and Bart Barendregt. Peter, your intellectual creativity always left me scrambling to keep up, and your ability to connect ideas across places and times has been truly inspiring. Bart, from the early days in your class to the last emails rounding up this project, your cheerfulness, kindness, and trust gave me the energy needed for this project. Moreover, I was so lucky to share this path with Dorien Zandbergen—you've been like an older sister to me. You swept me into events and conferences and dared me to take on things I didn't think I could—until I did. You've been a role model, an inspiration, and a shoulder to lean on within and beyond academia.

In Leiden, I was part of a wonderful PhD cohort. Christoph Rippe and Andrea Cerda Pereira, our postcards from the field show how research, creativity and friendship belong together. Marlous van den Akker, Khadija Kadrouch-Outmany, Annemarie Samuels, Roos Gerritsen, Wendy Hamelink, Maarten Onneweer, Richard Fraser, Cici, Hari Nugroho, Zamzam, Nuril Huda, Mayo Buenafe, Nikkie Buskermolen, Nikki Mulder, Tim van de Meerendonk, Irene Moretti, Sophie Feyder, and Tamsyn Adams—your companionship lightened the inevitable confusion and hard days of research.

I also thank my colleagues at the Institute of Cultural Anthropology and Development Sociology for teaching me, day by day, what it means to be an anthropologist: Mark Westmoreland, Metje Postma, Gerard Persoon, Erik Bahre, Ratna Saptari, Janine Prins, Jan Jansen, Marianne Maeckelbergh, Igor Boog, Patricia Spyer, Lea Zuyderhoudt, John Boy, Daphne Wong-A-Foe, James McGrail and many others. Jasmijn Rana, our writing retreats were a gift. Sabine Luning, you are sorely missed. Louise van Gent, Sarah Smit, Ilse Prins, and Sissy Hofmeester—thank you for your support and kindness.

Along the way, my work benefited from the generous feedback of Tim Bunnell and Daniel Goh at the National University of Singapore, as well as the stimulating conversations with scholars at the Futurities conference in Leiden and later at Duke University.

My PhD was shaped by my earlier experiences during my master's studies. I thank my lecturers in the MSc Creative Intelligence and Technology (formerly Media Technology) programme—Maarten Lamers, Edwin van der Heide, Bas Haring, and Fons Verbeek—for the special way in which you hold the space for students to discover their own paths. Lieven van Velthoven, Matt Jarvis, Stelious Giannoulis, and Richard Hardstone, you inspired me with your playful approach to technology and life. Hanna Schraffenberger, thank you for those insane writing marathons and for making me feel that what I have to say is worthwhile.

It feels like a beautiful turn of events that I am now back at LIACS and can contribute as a lecturer. I am truly grateful to Max van Duijn, Peter van der Putten, Rob Saunders, Tom Kouwenhoven, Danica Mast, Dan Xu, Bram van Dijk, Kristoffer Kalavainen, Matthijs van Leeuwen, Joon Hyung Lee, and Alexandra Blanc, among many others, for support, companionship and new beginnings.

I am truly fortunate to have friends who are also colleagues, colleagues who have become friends, and friends who are simply the best — Malvīne Mennika, Sandra Lapkovska, Eva Johansone, Alexandra Chmiel, Dominika Czerniawska, and Eva Abduļina. Thank you for rooting for me day in and day out. Krista Skrebele, without your care work in 2024, this thesis would not have been finished now.

Finally, I want to thank my family. You have been my strong foundation throughout this process. Inese Kripe, thank you for your no-nonsense attitude to life and the courage in how you embrace the open futurities. Aldis Zariņš, thank you for making even the most complex situations seem manageable. Mārtiņš Mazkalns, your love and support are beyond measure. I am so lucky you share your life with me. And to Jēkabs, Matilde, and Gertrūde—you're the best part of it all.

CURRICULUM VITAE

Zane Kripe was born in Valmiera, Latvia, on August 8, 1985. She obtained her pre-university education in Valmiera State Gymnasium in 2003 and her BA in Political Science with specialisation in International Relations from Riga Stradins University in 2007. During her studies, she participated in an Erasmus exchange program in Poland at Wyższa Szkoła Biznesu – National-Louis University, where she pursued courses in economics and business. In addition to and after her bachelor studies, she worked at Red Cross Latvia, the National Youth Council and the Ministry of Foreign Affairs. She was also the founding president of the first Leo youth club of Lions Clubs Latvia, Valmiera chapter.

After obtaining her bachelor's degree, she moved to the Netherlands and graduated with an MSc in Media Technology at Leiden University in 2010. Next to her studies, she worked at the International Institute for Asian Studies (IIAS).

In August 2010, Zane started her PhD at the Institute of Cultural Anthropology and Development Sociology at Leiden University. Over the years, she developed and taught courses on digital anthropology, information society and notions of technological freedom at Leiden University and the University of Amsterdam. During her employment as a PhD researcher (from 2010 – 2015), Zane was an active contributor to the Leiden Anthropology Blog and presented her work at several international conferences such as the EASST-4S, AoIR and EASA.

At the time of her PhD thesis defence Zane is a lecturer at the Leiden Institute of Advanced Computer Science (LIACS) at Leiden University, where she teaches courses with a critical and socially informed perspective on technology.
