Chronicles of Cosmic Dawn

- High redshift quasars as probes of supermassive black holes
and the intergalactic medium -

Proefschrift

ter verkrijging van
de graad van doctor aan the Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 13 november 2025
klokke 14:30 uur

door

Silvia Onorato

geboren te Palermo, PA, Italië
in 1996

Promotores:

Prof.dr. J.F. Hennawi and Prof.dr. J. Schaye

Promotiecommissie:

Prof.dr. I.A.G. Snellen

Prof.dr. P.P. van der Werf

Prof.dr. H. Hoekstra

Dr. V. D'Odorico (INAF - Trieste Astronomical Observatory)

Dr. F.B. Davies (Max Planck Institute for Astronomy)

ISBN: 978-94-6473-977-0

Cover: Illustration and layout by Elisa Mazzeri

Printed by: Ipskamp Printing

Cu nesci, arrinesci.
– *Proverbio siciliano (in dialetto)*

Chi esce, riesce.
– *Proverbio siciliano*

Who leaves, succeeds.
– *Sicilian proverb*

CONTENTS

1	Introduction	1
1.1	The Universe in the first billion years	1
1.1.1	The Epoch of Reionization	3
1.2	Active Galactic Nuclei	6
1.2.1	Black hole length scales and Eddington limit	7
1.2.2	Main pieces of the AGN puzzle	7
1.2.3	A few beasts in the “AGN zoo”	10
1.3	High-redshift quasars	13
1.3.1	$\text{Ly}\alpha$ absorption and Gunn-Peterson troughs	14
1.3.2	Damping wings	15
1.3.3	Proximity zones	17
1.4	Supermassive black hole growth	18
1.4.1	Seeding channels	18
1.4.2	Accretion physics and exponential growth	20
1.4.3	Mergers and other mass accretion channels	20
1.4.4	Episodic growth and duty cycle	21
1.5	This thesis	22
2	Optical and near-infrared spectroscopy of quasars at $z > 6.5$: public data release and composite spectrum	27
2.1	Introduction	28
2.2	The Data Set	30
2.2.1	Quasar Sample	30
2.2.2	Instruments	36
2.2.2.1	Dither sequences	36
2.2.2.2	Wavelength coverage, Slit widths, R , FWHM, and dv_{pix}	36
2.2.3	Data Reduction	37
2.2.4	Co-add of spectra from different instruments (or arms)	38
2.3	Quasar sample Properties	39
2.3.1	Redshift	39
2.3.2	Absolute flux calibration	40
2.3.3	Absolute magnitudes at $1450 \text{ \AA}$	41
2.3.4	SNR of the spectra	47
2.4	Comparison with other quasar samples	49
2.5	Composite Spectrum	52
2.5.1	Including BAL quasars	56
2.5.2	Dividing the sample into two redshift bins	57
2.5.3	Dividing the sample into two magnitude bins	58
2.6	Summary	59
2.7	Appendix: Flux scaling with J, Y, or K_p band photometry	63

2.8	Appendix: Absolute magnitude of J0910–0414 and J0923+0402 (BAL quasars)	64
2.9	Appendix: SNR	67
3	Homogeneous measurements of proximity zone sizes for quasars in the Epoch of Reionization	69
3.1	Introduction	70
3.2	The Data Set	73
3.2.1	The ENIGMA sub-sample	73
3.2.2	The E-XQR-30 sub-sample	74
3.2.3	The FIRE sub-sample	74
3.2.4	Final catalog	75
3.2.5	Redshift uncertainties	75
3.2.6	Absolute magnitudes at 1450 Å	77
3.3	Methods	78
3.3.1	Quasar continuum estimates using PCA	78
3.3.2	Proximity zone sizes	81
3.3.2.1	Measurements	81
3.3.2.2	Errors	82
3.4	Results	83
3.4.1	Comparison with the literature	83
3.4.2	Bivariate power-law fit of quasar proximity zones	94
3.4.2.1	Possible contaminants in proximity zones	97
3.4.2.2	Correlation with luminosity	100
3.4.2.3	Correlation with redshift	103
3.5	Summary and conclusions	105
3.6	Appendix: Continuum modeling for the quasars in the sample	106
3.7	Appendix: Additional results from the fit	106
3.8	Appendix: Metal absorbers analysis	115
4	The Lyα transmission probability distribution function from the E-XQR-30 sample	121
4.1	Introduction	122
4.2	The Data Set	124
4.3	Methods	128
4.3.1	Quasar continua prediction and transmission profiles	128
4.3.2	Mock spectra generation	131
4.3.3	PDF intervals determination	133
4.4	Results	135
4.4.1	Transmission PDF and residuals	135
4.4.2	Covariance and correlation matrices	138
4.4.3	Chi-square distribution	140
4.4.4	Discussion on the results	149
4.5	Summary	150

4.6	Appendix: Remaining quasar spectra and continua	151
4.7	Appendix: Correlation matrices example	152
4.8	Appendix: Non-Gaussian mock PDF distribution	152
	English summary	169
	Nederlandse samenvatting	173
	Riassunto in italiano	177
	Publications	181
	Curriculum Vitae	183
	Acknowledgements	185
