Redirecting TGF- β signaling pathways:

Advancing targeted therapy for PAH and FOP

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof. dr. ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op donderdag 20 november 2025

klokke 16:00 uur

door

Marius Wits

geboren te Groningen

in 1995

Promotor

Prof. Dr. M. J. T. H. Goumans

Co-Promotor

Dr. G. Sanchez-Duffhues

Leden promotiecommissie

Prof. Dr. P. H. A. Quax

Prof. Dr. P. ten Dijke

Prof. Dr. P. Knaus (Freie Universität Berlin)

Dr. P. B. Yu (Harvard Medical School, Massachusetts General Hospital)

Paranimfen

Clarissa Becher

Daphne Jurriens

Contents

	Nederlandse samenvatting	8
Chapter 1	General introduction	14
Part I	New molecular tools to identify TGF-β signaling modulators	
Chapter 2	TGF- β receptor-specific NanoBRET Target Engagement in living cells for high-throughput kinase inhibitor screens	34
Chapter 3	Advancing TGF- β specific NanoBRET-based methods to identify novel therapeutics for Pulmonary arterial hypertension	58
Part II	Unraveling new targets for treating PAH or FOP	
Chapter 4	Sex-biased TGF- β signaling in Pulmonary arterial hypertension	80
Chapter 5	Multi-omics reveals global signaling rewiring and identifies Activin A-induced dysregulation of FOP/Activator Protein 1 as a novel target in Fibrodysplasia ossificans progressiva	116
Appendix	Targeting Activator Protein 1 (AP-1) by T-5224 to treat FOP-like ACVR1 ^{R206H/+} mice	146
Chapter 6	PI3K α inhibition blocks osteochondroprogenitor specification and the hyper inflammatory response to prevent heterotopic ossification	156
Chapter 7	General discussion and future directions	198
Appendices	List of publications	213
	Dankwoord and acknowledgements	214
	Curriculum vitae	215
