Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr.ir. H. Bijl,

volgens besluit van het college voor promoties

te verdedigen op woensdag 19 november 2025

klokke 16:00 uur

door

Konstantinos Georgopoulos

geboren te Athene, Griekenland

in 1994

Promotor:

Prof. dr. ir. T. M. Bezemer

Co-promotor:

Dr. S. I. Gomes

Promotiecommissie:

Prof. dr. A. H. Meijer

Prof. dr. R. Offringa

Prof. dr. H. P. Spaink

Prof. dr. I. K. Schmidt (University of Copenhagen)

Dr. C. Veen (NIOO-KNAW)

Dr. S. E. Hannula

This thesis is part of the Silva Nova project and was funded by the Novo Nordisk Foundation, Hellerup, Denmark through a grant no. NNF20OC59948.

In memory of my beloved father...

Table of Contents

Chapter 1:	General introduction	9
Chapter 2:	Soil abiotic properties drive changes in the composition and functional roles of soil biota during afforestation	21
Chapter 3:	Effects of soil biotic and abiotic characteristics on tree growth and aboveground herbivory during early afforestation	45
Chapter 4:	Reduction of forest soil biota impacts tree performance but not greenhouse gas fluxes	87
Chapter 5:	Soil microbes from young and mature forests and nutrient availability influence root nodulation in <i>Alnus Glutinosa</i>	137
Chapter 6:	Non-destructive detection of <i>Frankia alni</i> in <i>Alnus glutinosa</i> with NIR spectroscopy	191
Chapter 7:	General Discussion	211
