Acknowledgments

The last five years were the biggest adventure of my life. I couldn't have built this new life without the support of my family: my father, George, my mother, Maria, and my brother, Chris. Thank you for your support, every sacrifice, and all your encouragement. I hope I am making you proud.

I express my deepest gratitude to my supervisor, Lars van den Hoek Ostende, for his unwavering guidance. His kindness, wisdom, patience, and insightful feedback were invaluable to my research and growth. Your dedication and passion for science are a constant inspiration. I am grateful for your encouragement and the hours you invested. Your generosity in welcoming me, even giving me a room, was unforgettable. I am honored to call you a friend.

Furthermore, I thank my promotor, Jan Wijbrans. Your calmness is always an inspiration. Thank you for fighting the bureaucracy and sharing your positive energy after each report. I will always remember our meetings in Leiden, enjoying a “biertje” and discussing plans. Thank you, and I look forward to seeing you in Greece.

I thank Constantine Doukas for introducing me to micromammals and believing in me. You first saw my potential and encouraged me to pursue this path. Your opportunity and advice were the cornerstone of this journey. I also thank my first teacher, Wilma Wessels. You supported me since my MSc years when I visited you and Hans de Bruijn, sharing material from Utrecht's collections and knowledge. Thank you. As for Hans, though he didn't see me finish, he was there for my first career steps. I owe him a big “Thank you” for his profound scholarly legacy. I will never forget you.

I thank Peter Joniak and Pablo Pelaez-Campomanes for the amazing Turkey expeditions, their support with literature, and project collaboration. Peter, I won't forget your hospitality in Slovakia. I look forward to our next excavation together. First round of beers is on me! Thank you both.

I express gratitude to our Turkish colleagues, especially Cihat Alçiçek, Serdar Mayda, and Fatma Arzu Demirel, for the material, publication help, and logistical support. I thank the Museum of Natural History of Ege University in İzmir, particularly Prof. Dr. Tanju Kaya and her staff, for their hospitality. Thank you to Ş. Şen and G. Billet from Muséum national d'Histoire naturelle in Paris for their assistance with the collections during my visit.

I cannot forget my comrades, colleagues, and friends from the excellent team that Lars, Peter, and Pablo created. Florentin Cailleux, Melike Bilgin, and Yanell Braumuller, thank you for the memories across Turkey, the Netherlands, and conferences. Thank you for your experience, positive attitude, and for being there during the difficult times. You are the best paleontologists! I also thank Rutger van den Hoek Ostende,

Eelco Kruidenier, Mark Doeland, Tim Rietbergen, and Rob Langelaan for their essential assistance in collecting and processing material.

I thank Erik Smets for his support as my group leader in Naturalis. Erik, you made my life easier and protected me in crisis. Thank you for supporting my side project and giving me a job during financially difficult times, instrumental to my stability. Furthermore, I thank Martin Rücklin for his tremendous help. I will never forget your great advice, immediate trust in my vision, and the new door you opened in my research career with 3D technology. Your hard work and support will always inspire me.

I express my warmest gratitude to Amalia Filippidi for her incredible support. Amalia, you opened your home to me and even gave me your favourite bicycle “gazellitsa”. Your advice and support were an anchor throughout this PhD adventure. I truly couldn’t have made it without you. I will always remember our dinner nights in Utrecht where we feast until we can’t get up from all the beers and food! Thank you for being like the older sister.

Of course, life is not only about research. I thank all my friends who provided support and joy. From Naturalis: Andres Rivera Quiroz, Roderick Bouman, Kevin Beentjes, Ryan Brewer, Vicky Beckers, Tim Claerhout, Werner de Gier, Mike Hynes, Lizzie Rooble, Le Qin Choo, Deyi Wang, Ajaree Thonglim, Isaak Eijkelboom, Elsa Girard, William Harrison, Pasha van Bijlert, Esther van der Ent, Giovanni Bortolami, Nemi Dorst, Hector Ortega Salas, James France, Gabrielle Legnaghi, Sharrah Mckenzie, Annabelle de Vries, Jada Carter, Iliana Bista, and Maria Perepelytsya. Thank you for the essential non-academic support: Vicky Makridou, Alexis Nikolouzos, Panagiotis Efstathiou, Lefteris Charakleias, Kelly Papastergiou, Kostas Bozaglykidis, Alessandro Giavara, Zoi Portokalidou, and Panos Kolios. Finally, thank you to my closest friends back home for their constant support since I started this crazy idea: Argyris Polizos, Chryssa Nomikou, Kostas Dimopoulos, Rolandos Koulas, Vasilis Paganopoulos, Simos Vartholomaios, Kostas Georgikos, Maria Kyriakou, Katerina Kordista, Blerina Gioka, Naya Koufoudaki, Elli Zisimopoulou, Elina Pantazopoulou, and Ioanna Mavragani. Thank you all for being there!

Curriculum Vitae Panagiotis Skandalos

Panagiotis Skandalos is a Greek-born paleontologist and researcher, born on June 18, 1990, in Athens, Greece. After graduating from Lycée Léonin de Patissia in 2008, he pursued a degree in Geology and Geoenvironment at the National and Kapodistrian University of Athens, completing his studies in 2014. In 2017 he earned his Master's degree in Paleontology from the same institution, specialising in depositional environments, ecosystems, and geo-bioresources. Panagiotis has been deeply involved in fieldwork throughout his career. He participated in numerous excavations, starting in 2009 in the Pikermi area, near the city of Athens. His projects include Paleontological excavations in Greece, Cyprus, Turkey and the USA and various fossil conservation efforts. Despite his first steps as a paleontologist, studying carnivora mammals, he was amazed by the world of micromammals and quickly tried to pursue a PhD project focusing on small mammals. In 2021 Panagiotis moved to The Netherlands as a PhD candidate at Leiden University, working in collaboration with the Naturalis Biodiversity Center. Panagiotis' work is marked by a deep commitment to advancing knowledge in paleontology, through research, new technology and hands-on fieldwork. His research focuses on 3D technology and various aspects of paleontology, including taxonomy and systematics. Beyond his professional roles, Panagiotis has volunteered as a member of the PhD council at Naturalis Biodiversity Center, contributing to the academic community and supporting fellow students from 2021 to 2023.
