A watercolor illustration of two kingfishers perched on a thin, light-colored branch. The kingfisher on the left is shown in profile, facing right, with its wings partially spread. It has a vibrant blue head, a long, sharp beak, and a body with orange, yellow, and blue patches. The kingfisher on the right is also in profile, facing left, and has a similar color palette with a more prominent blue head and back. The background is a soft, textured wash of light blue and white, suggesting a sky or water surface.
