Building Assyrian Society:
The Case of the Tell Sabi Abyad Dunnu

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 9 december 2025
klokke 10 uur
door
Tijmen Jan Robin Lanjouw
geboren te Groningen
in 1982

Supervisor:	Prof. dr. Bleda S. Düring
Additional Supervisor	Prof. dr. Peter M.M.G. Akkermans
Doctorate Committee:	Prof. dr. Jan C.A. Kolen (chair) Prof. dr. Joanita A.C. Vroom (secretary) Prof. dr. M. Pascal Butterlin (Université Paris 1 Panthéon-Sorbonne) Dr. Ing. Moritz Kinzel (German Archaeological Institute Istanbul) Dr. Jennifer L. Swerida

This PhD research was conducted within the framework of the ERC-funded project ‘Consolidating Empire. Reconstructing Hegemonic Practices of the Middle Assyrian Empire at the Late Bronze Age Fortified Estate of Tell Sabi Abyad, Syria, ca. 1230 – 1180 BC’, directed by prof. dr. B.S. Düring.

To my father

Acknowledgements

There are several people without whom the realisation of this dissertation would not have been possible. First and foremost, I wish to thank my supervisor, Bleda Düring. Your patience, guidance, and gentle but persistent encouragement, especially in the many years after my PhD position had formally ended, have been invaluable. I am deeply grateful for the time and care you put into commenting on draft after draft, even when I insisted on rewriting chapters from scratch. I will also fondly remember our journey to Erbil in Iraqi Kurdistan in search of a new Middle Assyrian site. Though brief, it was filled with slightly absurd yet fascinating moments, and it allowed us to get to know each other better. Thank you for bringing me along on that adventure.

I would also like to thank the *Dunnu* team, who made my Leiden years such an enjoyable and unforgettable experience. Although we went our separate ways long ago, the memories remain vivid: legendary *Dunnu* dinners, intense and never-ending stratigraphy debates, the Berlin excursion, symposia and conferences, *Dunnu* drinks, and even spontaneous beach trips - where we once reconstructed the entire excavation from sand, entirely from memory. Thank you, Victor, Merel, Hannah, Bleda, and Frans.

A special word is owed to Frans Wiggermann, who sadly passed away in 2024. His work on the texts from Tell Sabi Abyad forms an important foundation for this dissertation, but I remember him above all for his kindness. I will never forget that he offered me a place to stay - the very first time we met, in Belgisch Biercafé Olivier - and that he turned out to be the most liberal landlord and a truly pleasant housemate.

My sincere gratitude goes to Peter Akkermans and to the many people who excavated at Tell Sabi Abyad. Without your labour, perseverance, and resilience under the blazing sun and in biting dust storms, this desk-based research could never have existed. Your hardship has not been forgotten: I have read your notes, deciphered your scribbles on forms, studied your sketches, and relied on your reports. I also want to acknowledge those who remain largely silent in the documentation, the local workers, whose contribution is no less significant.

I am grateful to my friends and colleagues who read parts of this dissertation in preparation for the mock defence: Rogier, Eva, Aris, Victor, Lennart, Marleen, and Jitte. My thanks also go to my paranymphs, Niels and Lennart, for their support in the final months.

Finally, my deepest thanks go to my wife and girlfriend, Laurien, for sharing the burden that this dissertation placed on our life together. And to our children, Lennie and Lau: thank you for your presence and your wonderful, cheerful chaos.
