Elucidating the present and future of individuals with kidney disease

A multifaceted epidemiological approach

Roemer J. Janse

Roemer J. Janse and other researchers involved in this thesis declare no conflict of interest. The work on this thesis by Roemer J. Janse was supported by the Leiden University Medical Center through an MD/PhD grant from the Board of Directors and an innovation grant from Data Analytics, by the Dutch Kidney Foundation (200K016), by the Leiden University Fund, and by the Minerva Scholarship Fund. Copromotor dr. Merel van Diepen was also supported by a grant from the Dutch Kidney Foundation (200K016).

Elucidating the present and future of individuals with kidney disease
A multifaceted epidemiological approach

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr.ir. H. Bijl,
volgens besluit van het college voor promoties
te verdedigen op donderdag 8 januari 2026
klokke 14:30 uur

door

Roemer Jonah Janse
geboren te Vlissingen
in 2000

Promotor

Prof.dr. F.W. Dekker

Copromotor

Dr. M. van Diepen

Leden promotiecommissie

Prof.dr. F.R. Rosendaal

Prof.dr. J.G. van der Bom

Prof.dr. J.I. Rotmans

Dr. B.C. van Jaarsveld (Amsterdam UMC, Amsterdam, the Netherlands)

Dr. M. van Smeden (Utrecht UMC, Utrecht, the Netherlands)

The work described in this thesis was performed at the Department of Clinical Epidemiology of the Leiden University Medical Center in Leiden, the Netherlands and at the Department of Medical Epidemiology and Biostatistics of Karolinska Institutet in Stockholm, Sweden.

"If I have seen further it is by standing on the shoulders of Giants"

Isaac Newton

Table of contents

Chapter 01	General introduction and thesis outline	9
PART ONE: The present: Pharmacoepidemiology		
Chapter 02	Use of guideline-recommended medical therapy in patients with heart failure and chronic kidney disease: from physician's prescriptions to patient's dispensations, medication adherence and persistence <i>Eur J Heart Fail. 2022 Nov;24(11):2185-2195</i>	23
Chapter 03	Adherence and persistence to novel glucose-lowering medications in persons with type 2 diabetes mellitus undergoing routine care <i>Diabetes Res Clin Pract. 2024 Jul;213:111745</i>	45
Chapter 04	Stopping versus continuing renin-angiotensin-system inhibitors after acute kidney injury and adverse clinical outcomes: an observational study from routine care data <i>Clin Kidney J. 2022 Jan 12;15(6):1109-1119</i>	67
PART TWO: The future: Predictive epidemiology		
Chapter 05	Predicting hospitalisation and related outcomes in advanced chronic kidney disease: a systematic review, external validation, and development study <i>Kidney Med. 2025 Jul 1;7(7):101016</i>	91
Chapter 06	Predicting health-related quality of life after initiating dialysis: a prediction model development study <i>Manuscript in preparation</i>	117
Chapter 07	Predicting Kidney Failure With the Kidney Failure Risk Equation: Time to Rethink Probabilities <i>Am J Kidney Dis. 2023 Oct;82(4):381-383</i>	137

Chapter 08 Predicting the risk of and days without albuminuria as an early marker of kidney disease in patients with diabetes mellitus: a development and validation study 145
Manuscript in preparation

Chapter 09 Improving health-related quality of life after kidney transplantation using lifestyle interventions 167
Lancet Healthy Longev. 2024 Sep;5(9):100627

PART THREE: Methodological guidance

Chapter 10 Conducting correlation analysis: important limitations and pitfalls 175
Clin Kidney J. 2021 May 3;14(11):2332-2337

Chapter 11 When the whole is greater than the sum of its parts: why machine learning and conventional statistics are complementary for predicting the future 189
Clin Kidney J. 2025 Feb 20;18(4):sfaf059

Chapter 12 When impact trials are not feasible: alternatives to study the impact of prediction models on clinical practice 211
Nephrol Dial Transplant. 2024 Dec 20;40(1):27-33

Chapter 13 Summary and general discussion 227
