Shedding a light on vascular remodeling

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op woensdag 11 februari 2026
klokke 10:00 uur

door

Vincent Quentin Sier
geboren te Amsterdam
in 2000

Promotor
Co-promotor

Prof. dr. P.H.A. Quax
Dr. M.R. de Vries

Promotiecommissie

Prof. dr. M.J.T.H. Goumans
Dr. A. Schepers
Prof. Dr. K.K. Yeung, Amsterdam UMC
Prof. Dr. G Pasterkamp, UMC Utrecht

The research described in this thesis was financially supported by an MD-PhD grant from the Board of directors of the Leiden University Medical Center (LUMC)

Hold on to the moment like it's Heaven passing through

E.D. Felker

TABLE OF CONTENTS

Chapter I	General introduction	9
Chapter II	From mummies to internal mammaries: How did the historical understanding of atherosclerosis lead to cardiovascular bypass surgery?	19
Chapter III	Endoglin/CD105-based imaging of cancer and cardiovascular diseases: a systematic review	47
Chapter IV	Interfering in the ALK1 pathway results in macrophage-driven outward remodeling of murine vein grafts	93
Chapter V	Transforming growth factor-beta signaling via ALK1 and ALK5 regulates distinct functional pathways in vein graft disease	119
Chapter VI	Visualization of murine vascular remodeling and blood flow dynamics by ultra-high-frequency ultrasound imaging	175
Chapter VII	Cell-based tracers as trojan horses for image-guided surgery	207
Chapter VIII	PCSK9 inhibition pleiotropically promotes stable plaque neovascularization and attenuates VCAM-1-mediated leukocyte infiltration in accelerated atherosclerosis	251
Chapter IX	Sex-specific associations of the plasma-proteome with incident coronary artery disease	295
Chapter X	General summary & Future perspectives	335
Appendices	Nederlandse samenvatting	346
	Résumé de la thèse	354
	List of publications	362
	Curriculum Vitae	367
	Acknowledgments	368
