Acquired resistance in pancreatic cancer: characterization and exploration of actionable targets of a multifactorial disease

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van waarnemend rector magnificus,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 27 januari 2026
klokke 14:30 uur

door
Cecilia Bergonzini
geboren te Correggio, Italië
in 1995

Promotores:

Prof.dr. E.H.J. Danen

Prof.dr. T. Schmidt

Co-promotor

Dr. E. Giovannetti (Amsterdam UMC)

Promotiecommissie:

Prof.dr. M. van Eck

Prof.dr. E.C.M. de Lange

Prof.dr. L. Heitman

Dr. M. Pegtel (Amsterdam UMC)

Dr. P.J.K. Kuppen (Leiden University Medical Centre)

The research described in this thesis was performed at the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by the Dutch Cancer Society (KWF).

Table of Contents

Chapter 1	General introduction and thesis outline	7
Chapter 2	ABCB1 overexpression through locus amplification represents an actionable target to combat paclitaxel resistance in pancreatic cancer cells	25
Chapter 3	Targeting ABC transporters in PDAC – past, present, or future?	69
Chapter 4	Suppression of dCK activity is shared between gemcitabine resistant PDAC models	79
Chapter 5	Targeting Integrins for Cancer Therapy - Disappointments and Opportunities	109
Chapter 6	Prognostic Significance of Integrin Subunit Alpha 2 (ITGA2) and Role of Mechanical Cues in Resistance to Gemcitabine in Pancreatic Ductal Adenocarcinoma (PDAC)	139
Chapter 7	Metastasis: crosstalk between tissue mechanics and tumour cell plasticity	187
Chapter 8	Altered Mechanobiology of PDAC Cells with Acquired Chemoresistance to Gemcitabine and Paclitaxel	217
Chapter 9	General discussion and future perspectives	265
Appendix	Nederlandse samenvatting	277
