Future environmental impacts of hydrogen production and its use in container shipping

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr. S. de Rijcke,

volgens besluit van het college voor promoties

te verdedigen op woensdag 11 februari 2026

klokke 13.00 uur

door

Shijie Wei

geboren te Taiyuan, China

in 1994

Promotores:

Prof. dr. A. Tukker

Dr. B.R.P. Steubing

Promotiecommissie:

Prof. dr. J.B. Guinée

Prof. dr. M.G. Vijver

Prof. dr. A.H. Strømman (Norwegian University of Science and Technology)

Dr. N. Thonemann

Dr. S. Brynolf (Chalmers University of Technology)

Table of Contents

1	General introduction	1
2	Future environmental impacts of global hydrogen production	8
3	Life cycle assessment of hydrogen-based fuels use in internal combustion engines of container ships until 2050	30
4	Environmental impacts of fuel cell use in deep-sea shipping towards 2050.....	49
5	Decarbonizing potential of global container shipping with hydrogen-based fuels	72
6	General discussion	98
	Supporting information	106
	References.....	269
	Summary	284
	Samenvatting	288
	Acknowledgements.....	292
	Curriculum Vitae.....	293
	List of publications	294
