Novel methods to expedite schistosome vaccine development

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van (waarnemend) rector magnificus,
volgens besluit van het college voor promoties
te verdedigen op donderdag 29 januari 2026
klokke 14:30 uur

door

Jan Pieter Rudolf Koopman
geboren te Bergen op Zoom
in 1992

Promotor:

Prof. dr. M. Roestenberg

Prof. dr. A.M. Elliott (London School of Hygiene and Tropical Medicine)

Leden promotiecommissie:

Prof. dr. F.R. Rosendaal

Prof. dr. L.G. Visser

Dr. M.C. Kapulu (KEMRI-Wellcome Trust Research Program)

Dr. K. Polman (Instituut voor Tropische Geneeskunde, Antwerpen)

TABLE OF CONTENTS

Chapter 1	General Introduction	7
Chapter 2	A controlled human <i>Schistosoma mansoni</i> infection model to advance novel drugs, vaccines and diagnostics	17
Chapter 3	Safety and infectivity of female cercariae in <i>Schistosoma</i> -naïve, healthy participants: a controlled human <i>Schistosoma mansoni</i> infection study	57
Chapter 4	Risk assessment for the implementation of controlled human <i>Schistosoma mansoni</i> infection trials in Uganda	85
Chapter 5	Clinical tolerance but no protective efficacy in a placebo-controlled trial of repeated controlled schistosome infection	109
Chapter 6	Safety and preliminary efficacy of Sm-p80 + GLA-SE (SchistoShield®) vaccine against controlled human schistosome infection in healthy, <i>Schistosoma</i> -naïve adults: protocol for a double-blind, placebo-controlled randomised controlled human infection study	137
Chapter 7	Immunological considerations for <i>Schistosoma</i> vaccine development: transitioning to endemic settings	157
Chapter 8	Methodological considerations for future <i>Schistosoma</i> vaccine studies	201
Chapter 9	Summarising discussion and conclusion	209
	Nederlandse samenvatting	228
	Dankwoord (acknowledgements)	232
	Curriculum Vitae	234
	PhD Portfolio	235
	List of publications	236
