Capturing dynamics with noisy quantum computers

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 17 februari 2026
klokke 14:30 uur

door

David Simon Dechant

geboren te Fulda, Duitsland
in 1995

Promotores: dr. J. Tura
Prof. dr. V. Dunjko
Promotiecommissie: Prof. dr. ir. S. J. van der Molen
Prof. dr. C. W. J. Beenakker
dr. E. P. L. van Nieuwenburg
Prof. dr. M. Kliesch (Hamburg University of Technology)
Prof. dr. N. Liu (Shanghai Jiao Tong University)

Cover designed by Zhenya Cheipesh.

Meinen Eltern, für ihre Unterstützung und Erziehung

Contents

1	Introduction	1
1.1	Preface	1
1.2	Basics of quantum computing	3
1.2.1	Qubits, circuits and measurements	3
1.2.2	Variational quantum algorithms	5
1.2.3	Shot noise	6
1.3	Some applications of variational quantum computing	8
1.3.1	Differential equations	8
1.3.2	Elements of quantum machine learning	11
1.3.3	Applications of quantum computing to finance	14
1.4	Outline of this thesis	19
2	Approximation and Generalization Capacities of Parameterized Quantum Circuits for Functions in Sobolev Spaces	23
2.1	Introduction	23
2.2	PQCs and universal approximation	26
2.3	Connections between different generalization bounds	32
2.4	Numerical experiments	38
2.5	Conclusions	41
2.A	Proof of Theorems 2.2, 2.3 and 2.4	42
2.A.1	Féjer's mean	42
2.A.2	Periodic extension for C^0 functions	42
2.A.3	Periodic extension for H^k functions	43
2.A.4	Proof of Theorems 2.2, 2.3 and 2.4	44
2.B	Proof of Theorems 2.5, 2.6 and 2.7	45

3	Error and Resource Estimates of Variational Quantum Algorithms for Solving Differential Equations Based on Runge-Kutta Methods	53
3.1	Introduction	53
3.2	Preliminaries	56
3.2.1	Runge-Kutta methods	56
3.2.2	Variational quantum algorithm for solving differential equations	59
3.2.3	Errors and resources	64
3.3	Runge-Kutta methods without shot noise	66
3.4	Runge-Kutta methods under the presence of shot noise	67
3.5	Analysis of the variational quantum algorithm	70
3.5.1	Error and resource estimate	70
3.5.2	Estimation of the shot noise	72
3.5.3	Estimations based on a toy model	75
3.6	Numerical analysis of the error and resource estimates	80
3.6.1	Solving a classical ODE without shot noise	80
3.6.2	Solving a linear PDE with the variational quantum algorithm	82
3.7	Conclusions	90
3.A	Proof of Theorems 3.2 and 3.4	93
3.B	Proof of Theorem 3.3	98
3.C	Proof of Theorem 3.5	98
3.D	McLachlan’s variational principle	99
3.E	Shot noise estimates	101
3.F	Error bound theorems	103
4	Mitigating Shot Noise in Local Overlapping Quantum Tomography with Semidefinite Programming	107
4.1	Introduction	107
4.2	Background and preliminaries	109
4.2.1	Notations	109
4.2.2	Quantum state tomography	109
4.2.3	Semidefinite programming	111
4.2.4	Overlapping tomography and related literature	112
4.3	SDP-assisted overlapping tomography	113
4.3.1	Local Hamiltonian	113
4.3.2	Methodology	115
4.3.3	Numerical simulations	120
4.4	Application	123
4.4.1	Algorithmic cooling	124
4.4.2	Embedding SDP-assisted tomography	128
4.4.3	Numerical simulations	128

4.5	Conclusion and outlook	132
5	Quantum Generative Modeling for Financial Time Series with Temporal Correlations	133
5.1	Introduction	133
5.2	Background	136
5.2.1	Financial time series	136
5.2.2	Wasserstein QGAN	138
5.2.3	Related work	140
5.3	Implementation	141
5.3.1	Data pre-and post-processing	142
5.3.2	Quantum generator and full-state simulation	144
5.3.3	Matrix product state simulation	145
5.4	Results	148
5.4.1	Full-state simulation	148
5.4.2	MPS simulation	152
5.5	Analysis of the results	156
5.6	Conclusions	157
5.7	Code availability	158
5.A	Architecture of the discriminator	159
5.B	Comparison with quantum circuit Born machine	159
5.C	Full-state simulation: alternative circuit architecture	160
5.D	Full-state simulation: CZ gates instead of CNOT gates	161
5.E	MPS simulations for different numbers of layers and bond di- mensions	161
6	Conclusions	165
6.1	Research overview	165
6.2	Future work	168
	Bibliography	171
	Acknowledgments	195
	Samenvatting	197
	Summary	199
	Zusammenfassung	201
	Curriculum Vitæ	203
	List of publications	205
