Faster X-Ray Computed Tomography in Real-world Dynamic Applications

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op woensdag 4 februari 2026
klokke 14.30 uur

door
Adrianus Benedictus Maria Graas
geboren te Hoorn
in 1989

Promotor:

Prof.dr. K.J. Batenburg

Co-promotor:

Dr. F. Lucka (Centrum Wiskunde & Informatica)

Promotiecommissie:

Prof.dr. M.M. Bonsangue

Prof.dr.ir. F.J. Verbeek

Dr. L. Cao

Prof.dr. V. Kolehmainen (University of Eastern Finland)

Dr. N. Viganò (Commissariat à l'énergie atomique, CEA-IRIG)

The research presented in this dissertation was carried out at Centrum Wiskunde & Informatica (CWI) in Amsterdam. Financial support was provided by the Netherlands Organisation for Scientific Research (NWO), project numbers 613.009.106, 613.009.116, and VI.Vidi.223.059.

The illustrations on the cover and invitation depict the time-evolution of one bubble through a gas-solids fluidized bed, as measured by three X-ray detectors. See chapters 2 and 5.

Contents

1	Introduction	5
1.1	Primer on Computed Tomography	6
1.2	Applications	10
1.3	Tomographic pipelines	12
1.4	Optimizing tomographic pipelines	13
1.5	The trade-offs inside fast X-ray imaging set-ups	14
1.6	Faster reconstruction via tailored algorithms	17
1.7	Introduction into Deep Learning	20
1.8	Self-supervised Learning: Scan faster, repair later	22
1.9	Research Questions	24
2	Time-resolved Tomography of Fluidized Beds	31
2.1	Introduction	32
2.2	Related work	33
2.3	Material and methods	34
2.4	Theory	37
2.5	Results	42
2.6	Conclusion	54
3	Just-in-time Deep Learning	55
3.1	Introduction	56
3.2	Methods	59
3.3	Just-in-time Learning	62
3.4	Results	67
3.5	Discussion	72
4	ASTRA KernelKit	75
4.1	Introduction	76

4.2	Tomographic reconstruction	78
4.3	Software	80
4.4	Runtime and computational overhead analysis	83
4.5	Case studies	84
4.6	Conclusion	91
5	Blind-spot denoising of radiographs	95
5.1	Introduction	96
5.2	Background	97
5.3	Method	100
5.4	Results I: Radiograph denoising	105
5.5	Results II: Sparse-view Computed Tomography	110
5.6	Discussion	113
5.7	Appendix: Source code availability	115
5.8	Appendix: Estimation of the deconvolution kernel	115
6	Conclusions and outlook	119
7	Samenvatting	137
8	Publications	141
9	Curriculum Vitæ	143
