Through organs and across CD8<sup>+</sup> T-cell challenges

## **Proefschrift**

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr. S. de Rijcke,

volgens besluit van het college voor promoties

te verdedigen op donderdag 12 maart 2026

klokke 13:00 uur

door

Roos van Schuijlenburg

geboren te Voorburg

in 1993

Promotor

Prof. dr. M. Roestenberg

Co-promotor

Dr. B. Franke-Fayard

Leden promotiecommissie

Prof. dr. E. J. Snijder

Prof. dr. H. H. Smits

Prof. dr. J. J. van Hellemond (Erasmus Medisch Centrum, Rotterdam)

Dr. A. S. Yang

Dr. R. Amino (Pasteur institute, Paris)

## Table of contents

<b>Chapter 1</b>	General introduction	6
<b>Chapter 2</b>	Early activation of lung CD8 <sup>+</sup> T cells after immunization with live <i>Plasmodium berghei</i> malaria sporozoites.	25
<b>Chapter 3</b>	Human <i>Plasmodium falciparum</i> sporozoite effector-memory CD8 <sup>+</sup> T cells exhibit circumsporozoite protein-related antigen precursor epitope-specific activation and display distinct T cell receptor clustering.	62
<b>Chapter 4</b>	Human circumsporozoite-specific effector-memory CD8 <sup>+</sup> T-cells recognize and kill <i>Plasmodium falciparum</i> -infected hepatocytes.	86
<b>Chapter 5</b>	Ageing of <i>Plasmodium falciparum</i> malaria sporozoites alters their motility, infectivity and reduces immune activation <i>in vitro</i> .	111
<b>Chapter 6</b>	Intradermal immunization with <i>Plasmodium berghei</i> late-arresting genetically attenuated sporozoites induces PD-L1 expression on regulatory macrophages and dendritic cells.	140
<b>Chapter 7</b>	Single immunisation with genetically attenuated <i>PfΔmei2</i> (GA2) parasites by mosquito bite in controlled human malaria infection: a placebo-controlled randomised trial.	180
<b>Chapter 8</b>	Summarizing discussion	206
<b>Appendices</b>	English summary	234
	Nederlandse samenvatting	239
	Portfolio	245
	Curriculum vitae	249
	List of publications	250
	Acknowledgements	254
