Contents

Chapter 1	General introduction	9
Chapter 2	Algorithm-managed dosing and pharmacist-managed dosing of erythropoietin stimulating agents in renal anaemia: a systematic review	29
Chapter 3	A pharmacist-managed dosing algorithm for darbepoetin alfa and iron sucrose in haemodialysis patients: a randomised, controlled trial	79
Chapter 4	Trends in acceptance of pharmacist interventions during nephrology ward rounds over five years	101
Chapter 5	Medication-related health literacy in patients on haemodialysis assessed with the RALPH interview guide	123
Chapter 6	A multi-component Pharmacist Intervention with Dose Optimization of Phosphate-binding medication (PIDO-P) in patients on haemodialysis: phosphate concentrations remain stable with reduced pill burden after three months	147
Chapter 7	Implementation fidelity of a pharmacist-led intervention program to improve a high serum phosphate concentration in Dutch haemodialysis patients	171
Chapter 8	General discussion	213
Appendices	Summary	246
	Nederlandse samenvatting	252
	Curriculum vitae	257
	Portfolio	258
	Dankwoord	266
