From Inference to Influence: Applying Causal Game Theory to Complex Security Environments

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op donderdag 26 maart 2026
klokke 13.00 uur

door

Maarten Vonk

geboren te Rotterdam, Nederland

in 1993

Promotor:

Prof.dr. T.H.W. Bäck

Co-promotoren:

Dr. A.V. Kononova

Dr. T. Sweijs (Netherlands Defence Academy)

Promotiecommissie:

Prof. dr. K.J. Batenburg

Prof. dr. M.M. Bonsangue

Dr. A.W. Laarman

Prof. dr. A. Plaat

Dr. C. Doerr (Sorbonne University, France)

Prof. dr. M. Postma (Tilburg University, Netherlands)

This dissertation was supported by The Hague Centre for Strategic Studies, which provided a research position that complemented my work as a guest PhD candidate at the Leiden Institute of Advanced Computer Science. Additional support was provided by the Ministry of Foreign Affairs and the Ministry of Defense of the Netherlands through the PROGRESS framework. Responsibility for the contents rests solely with the author and does not constitute, nor should it be construed as, an endorsement by the Netherlands Ministries of Foreign Affairs and Defense. The Ministries had no involvement in the design, implementation, or content of the work.

Contents

1	Introduction	1
1.1	Research Questions	4
1.2	Contributions	5
1.3	Outline	6
1.4	Publications of the Thesis	7
2	Preliminaries	9
2.1	Probability Theory	9
2.2	Graphical Models	11
2.3	Game Theory	13
3	Causality and Assumptions	15
3.1	Introduction	16
3.2	Potential Outcome Framework	18
3.2.1	Potential Outcomes	18
3.2.2	Randomized Controlled Trials	19
3.2.3	Beyond Randomized Controlled Trials	21
3.2.4	Structural Causal Models	23
3.3	Associational Level	24
3.3.1	Bayesian Networks	24
3.4	Interventional Level	27
3.4.1	Causal Discovery	28
3.4.2	Identification and Inference	34
3.4.3	Discovery, Identification and Inference with More Relaxations	39
3.4.4	Practical Guide to Causal Inference	41
3.5	Counterfactual Level	42

Contents

3.5.1	One-Step-Ahead Potential Outcomes	44
3.5.2	Counterfactual Models	46
3.5.3	Inference	47
3.6	Conclusion and Future Work	48
4	Causal Game Theory	49
4.1	Introduction	50
4.2	Game Theory	51
4.2.1	Normal-Form Game	52
4.2.2	Extensive-Form Game	54
4.2.3	Bayesian Game	56
4.2.4	Practical Guide to Game Theory	57
4.3	Causal Game Theory	59
4.3.1	Influence Diagram	59
4.3.2	Multi-Agent Influence Diagram and Causal Game	60
4.3.3	Causal Bayesian Games	62
4.3.4	Practical Guide to Causal Game Theory	64
4.4	Conclusion and Future Work	65
5	Optimization of Causal Interventions	67
5.1	Introduction	67
5.2	Methodology	70
5.2.1	Discretization and Parameter Learning Methods	72
5.2.2	BDD Encoding and Weighted Model Counting	73
5.2.3	Optimization	74
5.3	Experimental Setup	74
5.3.1	Evaluation Measures	75
5.3.2	Bayesian Network Description	76
5.4	Results	80
5.4.1	Scalability of Inference Method	80
5.4.2	Trade-off Computational Cost and Quality of Discretization and Inference	81
5.4.3	Optimization Performance	83
5.5	Conclusion and Future Work	85

6	Real-World Applications	87
6.1	Environmental Conflict	87
6.1.1	Hypotheses	88
6.1.2	Data and Methods	91
6.1.3	Results	92
6.1.4	Conclusion and Future Work	97
6.2	Hybrid Threats	98
6.2.1	Methodology	99
6.2.2	Experimental Design	104
6.2.3	Results	106
6.2.4	Conclusion and Future Work	110
7	Conclusions and Future Work	111
7.1	Summary	111
7.2	Conclusions	114
7.3	Future Work	119
A	Acronyms and Notation Conventions	123
A.1	Acronyms	123
A.2	Notation Conventions	124
B	Appendix Chapter 5	126
B.1	Heatmap Results	126
B.2	Experimental Set-up	128
B.3	Evaluation Measures	130
C	Appendix Chapter 6	131
C.1	Experimental Data of Deterring Hybrid Threat	131
