The conducted research was supported by the Netherlands Organization for Health Research and Development (ZonMw-TOP grant 91214038), NWO Domain Applied and Engineering Sciences (NWO-TTW grant 13259), European Union's Seventh Programme for research, technological development and demonstration under grant agreement N° PhagoSys HEALTH-F4-2008-223451, EU-ToxRisk project (An Integrated European "Flagship" Program Driving Mechanism-Based Toxicity Testing and Risk Assessment for the 21st Century) funded by the European Commission under the Horizon 2020 program (Grant Agreement No. 681002) and the Dutch Research Council Domain Applied and Engineering Sciences (NWO-AES) within the Novel Antibacterial Compounds and Therapies Antagonising Resistance (NACTAR) program (Grant No. 16444).

HOST-DIRECTED THERAPY FOR THE TREATMENT OF TUBERCULOSIS

REWIRING THE HOST TO RECOVER CONTROL

PROEFSCHRIFT

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr. S. de Rijcke,

volgens besluit van het college voor promoties

te verdedigen op donderdag 23 april 2026

klokke 14.30 uur

door

Maarten Thomas Heemskerk

geboren te Leiden

in 1989

Promotoren

Prof. dr. T.H.M. Ottenhoff

Prof. dr. A.H. Meijer

Leden promotiecommissie

Prof. dr. W. Bitter, Amsterdam UMC

Prof. dr. A. Geluk

Prof. dr. R.C. Hoeben

Prof. dr. J.J.C Neefjes

Prof. dr. H.P. Spaink, Universiteit Leiden

TABLE OF CONTENTS

CHAPTER 1	Introduction	7
CHAPTER 2	Combined Chemical Genetics and Data-Driven Bioinformatics Approach Identifies Receptor Tyrosine Kinase Inhibitors as Host-Directed Antimicrobials	44
CHAPTER 3	Novel Host-Directed Kinase Inhibitors Suppress Intracellular Bacteria by Enhancing (Auto-) Lysosomal Targeting	106
CHAPTER 4	Repurposing Diphenylbutylpiperidine-Class Antipsychotic drugs for Host-Directed Therapy of <i>Mycobacterium tuberculosis</i> and <i>Salmonella enterica</i> Infections	154
CHAPTER 5	Repurposing Tamoxifen as Potential Host-Directed Therapeutic for Tuberculosis	196
CHAPTER 6	Functional Inhibition of Host Histone Deacetylases (HDACs) Enhances <i>in vitro</i> and <i>in vivo</i> Anti-Mycobacterial Activity in Human Macrophages and in Zebrafish	244
CHAPTER 7	Summarizing Discussion	286
APPENDICES	English Summary	341
	Nederlandse Samenvatting	345
	Curriculum Vitae	350
	List of Publications	350
	Acknowledgements	352
