The work described in this thesis was performed at the Netherlands Cancer Institute – Antoni van Leeuwenhoek, Amsterdam, the Netherlands.

The printing of this thesis was financially supported by the kind contribution of the Oncology Graduate School Amsterdam (OGA), the Netherlands Cancer Institute, and Universiteit Leiden.

Combining surgery and systemic therapy in metastatic melanoma

Combineren van chirurgie en systeemtherapie in gemetastaseerd melanoom

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op donderdag 30 april 2026

klokke 11:30 uur

Table of Contents

Chapter 1	General introduction and thesis outline	9
------------------	---	---

PART I	Neoadjuvant targeted therapy in unresectable locally advanced melanoma
---------------	---

Chapter 2	Neoadjuvant cytoreductive treatment with BRAF/MEK inhibition of prior unresectable regionally advanced melanoma to allow complete surgical resection, REDUCTOR: a prospective, single arm, open-label phase II trial. <i>Annals of Surgery, 2021</i>	19
------------------	---	----

Chapter 3	[18F]FDG PET/CT during neoadjuvant targeted therapy in prior unresectable stage III melanoma patients: can (early) metabolic imaging predict histopathologic response or recurrence? <i>Clinical Nuclear Medicine, 2022</i>	37
------------------	--	----

PART II	Adjuvant immunotherapy
----------------	-------------------------------

Chapter 4	Adjuvant systemic therapy in high-risk melanoma. <i>Melanoma Research, 2019</i>	55
------------------	--	----

Chapter 5	Identification of biomarkers predictive for recurrence of disease after surgery with or without adjuvant anti-PD-1 for stage III melanoma. <i>Journal for ImmunoTherapy of Cancer, 2024</i>	69
------------------	--	----

PART III **Population-based studies**

Chapter 6	Surgery for Unresectable Stage IIIC and IV Melanoma in the Era of New Systemic Therapy. <i>Cancers, 2020</i>	93
Chapter 7	Is a history of optimal staging by SLNB in the era prior to adjuvant therapy associated with improved outcome once melanoma patients have progressed to advanced disease? <i>Annals of Surgical Oncology, 2022</i>	113

PART IV **Concluding remarks**

Chapter 8	General discussion	135
Chapter 9	English summary Nederlandse samenvatting	145
Appendices	List of publications Dankwoord Curriculum vitae	151
