Speed in Music

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 2 juni 2026
klokke 16:00 uur

door

Edward Louis McGowan
geboren te Pittsburgh, Pennsylvania, in 1970

Promotores

Prof. dr. R. J. Barrett

Prof. dr. M. Cobussen

Promotiecommissie

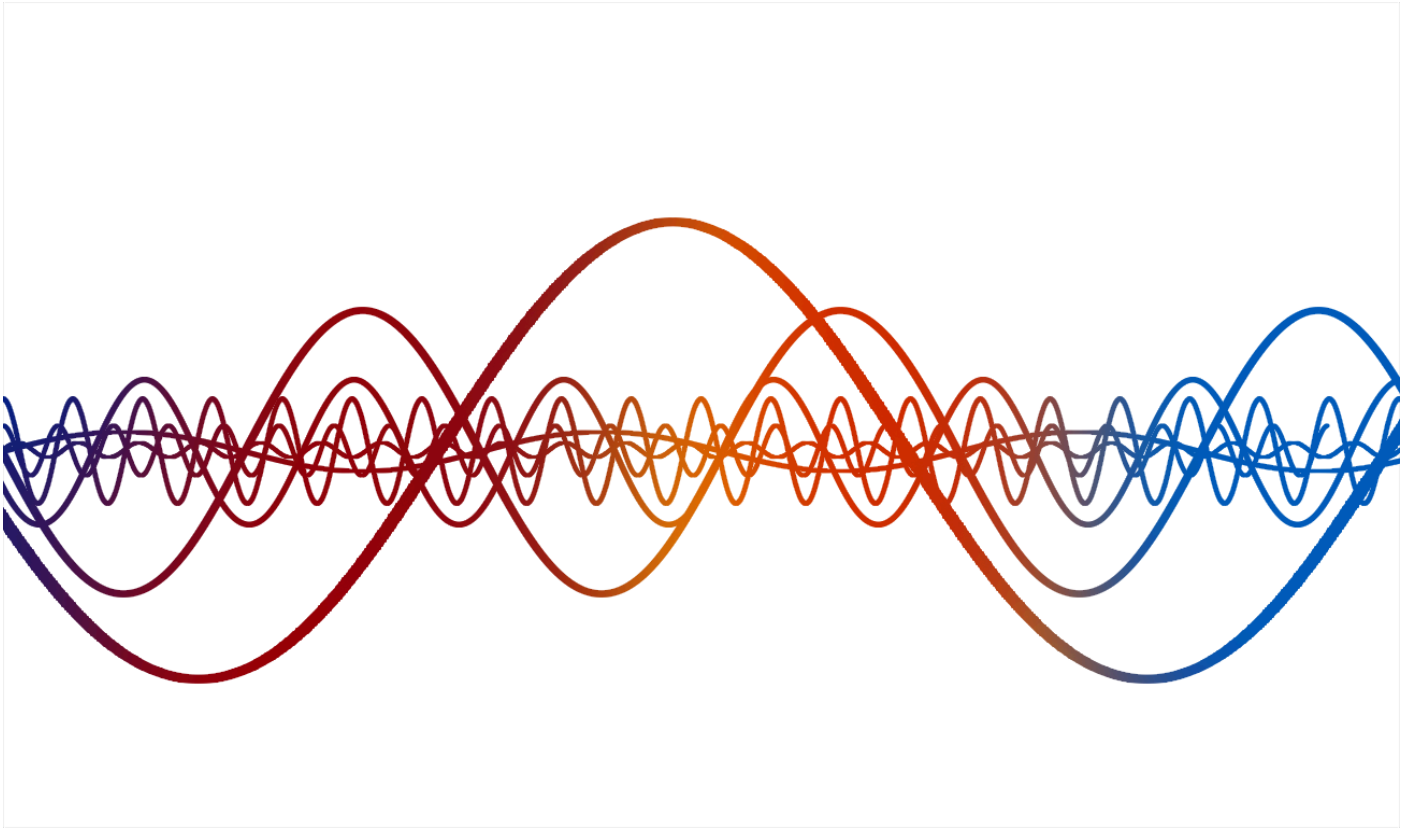

Prof. dr. H.A. Borgdorff

Prof. dr. R. de Groot (Universiteit van Amsterdam)

Dr. Y. Kyriakides (Royal Conservatoire The Hague)

Dr. M. Phillips (Royal Northern College of Music)

Speed in Music

Ned McGowan

Acknowledgements

First and foremost, I would like to thank my mother and father, Anne and Joseph McGowan. Without their support I could not have started on the path to becoming a musician, leading up to this moment.

I owe a great debt to my supervisors Marcel Cobussen and Richard Barrett for their tenacious attention to detail at multiple scales. Engaging with your comments has been both educational and transformative; your feedback invited me to explore whole new areas of knowledge with direct relevance to my artistry, research, and teaching. I would also like to thank Rebecca Schaefer and Michiel Schuijjer for their support and valued input during their time as supervisors.

Special thanks to Henk Borgdorff, Henrice Vonk, and the research-coaching team at Codarts, not only for teaching me what artistic research can be, but for helping me discover my own approach to it. Thanks also to Floris Schuiling for many enriching conversations about musicology and artistic research.

My composition teachers Martijn Padding and Clarence Barlow shaped my thinking profoundly, and I thank them both: Martijn for his craft and rigour, Clarence for the joy of understanding and perspective.

Thanks to B.C. Manjunath, Dr. Mysore Manjunath, Dr. Suma Sudhindra, and Jahnvi Jayaprakash for opening my ears to the beauties of speed in Carnatic classical music. I also thank Kristina Fuchs and Tobias Klein for sharing rhythm courses with me, and all of my rhythm students at CvA, the Utrecht Conservatory, and the International Rhythm Course — I learned so much about my own approach to rhythm through working with you.

Among my many music teachers, I am especially grateful to Gary Stotz for bridging mind and heart, improvisation and reading; to my Eurhythmics teacher David Brown for teaching me the embodiment of speed; to my flute teachers Anne La Berge, Tim Day, Robert Dick, Mary Kay Fink, and Jeffrey Khaner; and to Marshall Griffith for jazz piano. I also thank percussionist Steven Schick and composers Brian Ferneyhough, John Zorn, Conlon Nancarrow, and György Ligeti.

Gijs Levelt, Susanna Borsch, Ere Lievonen, and Stephe Buttrich (of Hexnut) — working with you is where many of my rhythmic ideas were first worked out.

At HKU University of the Arts Utrecht and the Utrecht Conservatorium, I am especially grateful to Jos Schillings for his advice, regular check-ins, and encouragement, and to Cecile Rongen and Marjolijn Boersma for their continued support, and to Falk Hubner for his support through the initial challenges. I also thank my research colleagues at Utrecht Conservatory and Fontys.

Thanks to Frans de Ruiter and the ACPA team, and to Luk Vaes and the team at the Orpheus Institute.

I gratefully acknowledge financial support from the NWO, Fontys, and the Schuurman Schimmel-van Outereren Stichting, and the Fonds Podiumkunsten, who commissioned many of the works discussed here.

Thanks to Bas Bouma for his technical assistance in creating the 25 speed-transformed versions of Beethoven's *Ninth Symphony* and the title image, and to Guy Livingston, with whom I formed a PhD tag-team — helping each other through each stage.

I would like to thank the following ensembles for their performances of works discussed in this dissertation: Axyz Ensemble, Calefax Reed Quintet, David Kweksilber Big Band, Jerboah, New European Ensemble, and Pittsburgh New Music Ensemble. I also thank the individual musicians who performed these works, listed alphabetically by last name: Marcos Baggiani, Laurens de Boer, Susanna Borsch, Stephe Buttrich, Guillermo Celano, Kenneth Cox, Evelin Degen, Brechtje van Dijk, Rob van Dord, David Dramm, Diamanda Dramm, Claire Edwards, Felicia van den End, Robert Fleitz, Kristina Fuchs, Oene van Geel, Eleni Giovanis, Benjamin Marquise Gilmore, Mark Haanstra, Jennifer van de Hart, Elena Herrero, Camilla Hoytenga, Antoni Inglés, Kasper Janse, Sarah Jeffery, Nathalie Joachim, Dodó Kis, Tobias Klein, Ilonka Kolthof, Lydia Kordonia, Inés Lacerda, Anne La Berge, Gijs Levelt, Ere Lievonen, B. C. Manjunath, Reiko Manabe, Niels Meliefste, Benjamin Mitchell, Gregory Oakes, Kate Outterbridge, Ralph van Raat, Hannah Reardon-Smith, Eric Lamb Rummel, Alfrun Schmid, Hannah Shaw, Angelika Sheridan, Keiko Shichijo, Elizabeth Smalt, Katie Spencer, Srihari, Jeff Stern, Eric Vloeimans, Samuel Vriezen, Helena Winkelman, and Aaron Wolff.

I would like to thank the sport of running — and Asics — during which many of my ideas crystallised and found their way into words. It is hard to overstate the role running has played in my life.

I would like to dedicate this work in part to the memory of Bob Gilmore, who encouraged me to situate my artistic world in an academic context, sparking a whole new phase as an artist-researcher.

And last — and most — I also dedicate this dissertation to you, my wife Keiko and son Kiyoharu, whose love, patience, and understanding made all of this possible.

Table of Contents

Acknowledgements.....	IV
Chapter 1: Introduction.....	1
1.1 Stories.....	1
1.2 Research Topic and Research Questions.....	3
1.3 Speed in My Music.....	5
1.4 Why Speed?.....	12
1.5 Outline.....	16
Chapter 2: What is Speed in Music?.....	19
2.1 Thresholds of Speed.....	20
2.2 Temporal Resolution.....	30
2.3 Density and Motion.....	35
2.4 Smooth and Striated Time.....	45
2.5 Listener-Environment-Musical Stimulus-Interaction Model and Situated Knowledge.....	66
Chapter 3: Tuplets.....	77
3.1 What is a tuplet?.....	77
3.2 Changing tuplets in music.....	88
3.3 Ratio tuplets.....	92
3.4 Tuplets within tuplets.....	98
3.5 The experience of tuplets.....	100
3.6 Conclusion.....	101
Chapter 4: Polytempo Music.....	103
4.1 Introduction.....	103
4.2 The Rhythmic Grid.....	105
4.3 Combinations of Rhythmic Elements For Possible Musics.....	109
4.4 Polytempo Music.....	126
4.5 My Polytempo Works.....	129
4.6 Conclusion.....	160
Chapter 5: Speed of Creation.....	162
5.1 Introduction.....	162
5.2 Improvisation, Fixation, and Transfer.....	164
5.3 Torrent Examined More Closely.....	166
5.4 Speed of Creation: A Map of Approaches by Speed and Reflective Latitude.....	167
5.5 Free Improvisation: Tensions and Function.....	173
5.6 Tactile Processes and Control Parameters.....	174
5.7 Navigating Speed Through Chunking and Real-time Decision-making.....	178
5.8 Flow, Temporal Integration, and the Improviser's Mindset.....	179
5.9 Notation, Reperformance, and Interpretive Space.....	180
5.10 Conclusion.....	189
Conclusion.....	190
References.....	197
Abstract.....	210
Samenvatting.....	211
Curriculum Vitae.....	212
