The background is a vibrant, abstract composition. At the center is a large, circular, multi-colored pattern resembling a stylized eye or a cross-section of a flower. This central motif features a dark, almost black, circular core. Radiating from this core are concentric rings of color, including shades of orange, yellow, green, and blue. The colors are blended and textured, giving the impression of a microscopic view or a complex biological structure. Scattered throughout the entire image are numerous yellow circles of varying sizes, some of which are semi-transparent, creating a sense of depth and movement. The overall color palette is dominated by blues, greens, and yellows, with the central eye-like pattern providing a focal point of intense color and detail.

DISCOVERING BIOMARKERS AND DRUGGABLE TARGETS IN UVEAL MELANOMA
