Profiling of proteins and targeting of myeloid mechanisms in atherosclerosis

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op dinsdag 30 juni 2026

klokke 13.00 uur

door

Lucie Delfos

geboren te 's-Gravenhage

in 1994

Promotores: Prof. dr. I. Bot
Dr. B.A. Slütter

Promotiecommissie: Prof. dr. M. van Eck
Prof. dr. E.C.M. de Lange
Prof. dr. M.J.T.H. Goumans (Leids Universitair Medisch Centrum)
Dr. F.A.M. Redegeld (Universiteit Utrecht)
Dr. S. Kooijman (Leids Universitair Medisch Centrum)

The research described in this thesis was performed at the division BioTherapeutics of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research described in this thesis was supported by grant 2019T067 from the Dutch Heart Foundation.

Table of contents

Chapter 1:	General introduction	7
Chapter 2:	Activity-based protein profiling of human carotid atherosclerosis	33
Chapter 3:	Treatment with APAC, a dual AntiPlatelet AntiCoagulant heparin proteoglycan mimetic, limits early collar-induced carotid atherosclerotic plaque development in <i>ApoE</i> ^{-/-} mice	69
Chapter 4:	NLRP3 Inflammasome inhibition by the novel bispecific antibody InflamAb attenuates atherosclerosis in apolipoprotein E-deficient mice	97
Chapter 5:	Modulation of IL-1, IL-6 and IL-18 cytokine signaling in animal models of atherosclerosis: a systematic review evaluating animal sex in preclinical research	139
Chapter 6:	General discussion and future perspectives	217
Appendix:		235
	Nederlandse samenvatting	236
	List of publications	241
	Curriculum vitae	243
