A watercolor illustration of a human spine, showing the vertebrae and intervertebral discs. The spine is rendered in shades of brown, tan, and green. A network of white lines and dots is overlaid on the spine, particularly concentrated in the lower back region, suggesting a digital or algorithmic overlay. The background is a textured, light brown and beige watercolor wash with some darker green and brown spots. The overall style is artistic and scientific.

Optimizing Care in Lumbar Radiculopathy and Neurogenic Claudication

From injection to inference,
and from clinician to algorithm
