The background features a watercolor-style illustration of a human spine, oriented vertically. The upper portion of the spine is rendered in warm, golden-brown tones, while the lower portion transitions into cooler, teal and blue-green hues. A white, interconnected network of lines and nodes is overlaid on the lower vertebrae, suggesting a digital or data-driven theme. The overall background is a textured, light beige color with soft watercolor washes and faint, thin white lines crisscrossing the space.

## Optimizing Care in Lumbar Radiculopathy and Neurogenic Claudication

From injection to inference,  
and from clinician to algorithm

Eduard J.A. Verheijen
