A painting of a theater stage. At the top, heavy red curtains with a gold fringe hang down. A bright yellow spotlight shines from the top center onto a rectangular area on the stage floor. This spotlighted area contains several red upholstered chairs arranged in a semi-circle. The rest of the stage floor is dark, and many black chairs are scattered around the perimeter, mostly facing away from the viewer. The overall style is painterly and dramatic.

**How CD4⁺ T-cell help shapes
functional and dysfunctional
CD8⁺ T-cell differentiation**
