Field-deployable immunodiagnostics for poverty-associated infectious diseases: development and use cases in public health

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof.dr. S. de Rijcke,

volgens besluit van het college voor promoties

te verdedigen op donderdag 10 september 2026

klokke 13.00 uur

door

Louise Pierneef

geboren te Heemskerk

in 1994

Promotor:

Prof. dr. A. Geluk

Co-promotor:

Dr. ir. P.L.A.M. Corstjens

Leden Promotiecommissie:

Prof. dr. L.G. Visser

Dr. E.A. van Lieshout

Prof. dr. ir. J.C. Diehl (Faculty of Industrial Design Engineering, Delft University of Technology, Delft, the Netherlands)

Prof. dr. E. Hasker (Institute of Tropical Medicine, Antwerp, Belgium)

Table of Contents

Chapter 1	General introduction	6
Chapter 2	Detection of anti- <i>M. leprae</i> antibodies in children in leprosy-endemic areas: A systematic review	20
Chapter 3	Rapid test for <i>Mycobacterium leprae</i> infection: a practical tool for leprosy	44
Chapter 4	Field-friendly anti-PGL-I serosurvey in children to monitor <i>Mycobacterium leprae</i> transmission in Bihar, India	70
Chapter 5	Seroprevalence of anti- <i>Mycobacterium leprae</i> PGL-I antibodies among school children in rural and urban Indonesia: a cross-sectional study (2023)	92
Chapter 6	Large-scale field application of rapid test for <i>Mycobacterium leprae</i> infection in the Comoros and Madagascar: population-wide effects of case finding and post-exposure prophylaxis on transmission in the PEOPLE trial	112
Chapter 7	Host biomarker-based quantitative rapid tests for detection and treatment monitoring of tuberculosis and COVID-19	140
Chapter 8	General discussion	178
	List of abbreviations	197
	Nederlandse samenvatting	198
	Dankwoord	202
	Curriculum vitae	204
	List of publications	205
	Portfolio	206
