Virtual patient populations for quantitative pharmacology with its application in antibiotic treatment optimization

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof.dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op vrijdag 11 september 2026
klokke 11:30 uur

door

Yuchen Guo
geboren te Shaanxi, China
in 1997

Promotor: Prof. dr. J.G.C. van Hasselt

Co-promotores: Dr. T. Guo

Dr. L.B. Zwep

Promotiecommissie: Prof. dr. M. van Eck

Prof. dr. E.C.M. de Lange

Dr. D.J.A.R. Moes (Leiden University Medical Center)

Prof. dr. R.A.A. Mathôt (University of Amsterdam)

Prof. dr. T. Nagler (LMU München)

The research described in this thesis was performed at the Systems Pharmacology and Pharmacy division of the Leiden Academic Centre for Drug Research (LACDR), Leiden University (Leiden, The Netherlands). The research was financially supported by the China Scholarship Council (CSC).

Contents

1	General introduction and outline	1
---	----------------------------------	---

I Virtual patient population generation

2	Tutorial: Copulas for covariate simulation in R	13
3	Generation of realistic virtual adult populations using a model-based copula approach	47
4	Joint distribution modelling of hepatic drug metabolizing enzymes and transporters expression for PBPK-driven virtual patient simulation	75

II Virtual patient in antimicrobial analysis

5	Pharmacodynamic modeling of colistin and imipenem against <i>in vitro</i> <i>Pseudomonas aeruginosa</i> biofilms	105
6	Spatial pharmacokinetic and pharmacodynamic modeling in airway mucus	139

III Discussion and summary

7	General discussion and summary	177
8	Nederlandse samenvatting	191

Appendices

Curriculum vitae	198
List of publications	199
