Glycosylation Signatures of Type 2 Diabetes Complications and Metabolic Syndrome

Elham Memarian

Glycosylation Signatures of Type 2 Diabetes Complications and Metabolic Syndrome

PhD thesis, Leiden University, Leiden, the Netherlands.

The research described in this thesis was carried out at the Department of Center for Proteomics and Metabolomics (CPM) of Leiden University Medical Center (LUMC), Leiden, the Netherlands.

This work was financially supported by a grant from the European Union's Horizon 2020 research and innovation program under the Marie Skłodowska–Curie grant for the project GlySign (contract no. 722095).

Cover design: Farnam Memarian

Layout: Elham Memarian

Printing: University Press

Glycosylation Signatures of Type 2 Diabetes Complications and Metabolic Syndrome

Proefschrift

ter verkrijging van
de graad van doctor aan de Universiteit Leiden,
op gezag van rector magnificus prof. dr. S. de Rijcke,
volgens besluit van het college voor promoties
te verdedigen op donderdag 17 september 2026
klokke 16:00 uur

door

Elham Memarian

Promoters:

Prof. Dr. M. Wuhrer

Prof. Dr. G. Lauc

*Genos, Glycoscience Research Laboratory, Zagreb,
Croatia
Faculty of Pharmacy and Biochemistry, University of
Zagreb, Zagreb, Croatia*

Co-promotores:

Dr. V. Dotz

Promotion committee members:

Prof. Dr. ir. J.A.P. Willems van Dijk

Dr. L. R. Ruhaak

Dr. A. Bondt

*Biomolecular Mass Spectrometry and Proteomics,
Bijvoet Center for Biomolecular Research and
Utrecht Institute for Pharmaceutical Sciences,
Utrecht University, Utrecht, Netherlands*

Prof. D. Lefeber

*Department of Neurology, Department of Genetics,
Translational Metabolic Laboratory, Radboudumc,
Nijmegen, The Netherlands*

To both of my Families

Table of contents

Chapter 1	Introduction	9
Chapter 2	Utilization of <i>N</i> -glycosylation profiles as risk stratification biomarkers for suboptimal health status and metabolic syndrome in a Ghanaian population	37
Chapter 3	Plasma protein <i>N</i> -glycosylation is associated with cardiovascular disease, nephropathy, and retinopathy in type 2 diabetes	65
Chapter 4	IgG <i>N</i> -glycans are associated with prevalent and incident complications of type 2 diabetes	85
Chapter 5	<i>N</i> -glycome analysis of dried blood spots from different blood preparations and its potential for pre-diabetes and diabetes distinction	107
Chapter 6	Discussion and Perspectives	125
A. Appendix		143
