Fabrication and biosensing with graphene edges

Proefschrift

ter verkrijging van

de graad van doctor aan de Universiteit Leiden,

op gezag van rector magnificus prof. dr. S. de Rijcke,

volgens besluit van het college voor promoties

te verdedigen op woensdag 16 september 2026

klokke 10:00 uur

door

Jianwei Gao

geboren te Weifang, China

in 1996

Promotores:

Prof. dr. G.F. Schneider

Prof. dr. A. Kros

Co-promotor:

Dr. W. Fu (Tsinghua University)

Promotiecommissie:

Prof. dr. M. Ubbink

Prof. dr. J. M. van Ruitenbeek

Prof. dr. S. Bonnet

Prof. dr. C. Bittencourt (University of Mons)

Prof. dr. Z. Zhang (Tsinghua University)

Table of Contents

Chapter 1	5
Role of defects in sensing applications with graphene	
Chapter 2	30
Edge-dominant dielectrophoretic graphene nanoribbon transistors for attomolar miRNA detection	
Chapter 3	57
Quantum capacitance at the edge of a graphene monolayer	
Chapter 4	93
Quantum-capacitive activation of diazonium-functionalized graphene edges for reversible biosensing	
Chapter 5	125
Graphene-bridged organic electrochemical transistors for high-performance molecular detection	
Chapter 6	142
Conclusion and outlook	
Samenvatting	147
List of publications	150
Curriculum vitae.....	151
Acknowledgements	152
