Table of contents

Samenvatting	8
Summary	10
Chapter 1. General introduction	13
1.1 Food systems as drivers of environmental pressures	13
1.2 Dietary change as a high-leverage intervention	13
1.3 Factors hindering the transition in the EU+UK context	14
1.4 Research gaps	16
1.5 Research approach	17
1.6 Research question and thesis outline	20
Chapter 2. Over 80% of the EU's CAP supports emissions-intensive animal products	23
2.1 Introduction	23
2.2 Methods	24
2.3 Distribution of CAP subsidies	25
Chapter 3. Assessing land use, CAP subsidies, and farm-economics under Planetary Health Diets	31
3.1 Introduction	31
3.2 Methods	32
3.3 Transition impacts of the EU food system	33
3.4 Regional archetypes of EU food production under a dietary transition	35
3.5 Reframing the CAP	38
3.6 Budgetary and job space for reallocation	40
Chapter 4. Stranded assets in European agriculture during food system transformations	43
4.1 Introduction	43
4.2 Methods	44
4.3 Farm-level asset landscape	46
4.4 Asset stranding under dietary transitions	47
4.5 Plant-based asset growth and repurposing	50
4.6 Depreciation and timelines for asset phase-out	50
4.7 Policy responses to stranded asset risks	50
4.8 Systemic and downstream repercussions	52
Chapter 5. An open-source regionalisation approach for subnational EEMRIO insights	55
5.1 Introduction	55
5.2 Methods	58
5.2.1 Fundamentals of input-output analysis	58
5.2.2 Expansion of the EEMRIO model	58
5.2.3 Disaggregation of national data to subnational estimates	59
5.2.4 Application to EXIOBASE with subnational Eurostat data	65
5.2.5 Small-scale example	65
5.3 Case study of steel flows between Spain and France	68
5.4 Comparison of subnational footprints	69

5.5 Advantages and limitations of the regionalisation approach	70
5.5.1 Location quotients.....	70
5.5.2 Regionalised EEMRIO model.....	71
5.6 Outlook and potential application	72
5.7 Scope of the regionalisation framework	72
Chapter 6. The geography of dependence: regional farm profits and tailored CAP reform.....	75
6.1 Introduction	75
6.2 Methods	76
6.3 Geography of CAP dependence	77
6.4 Uneven regional exposure under dietary transition	79
6.5 Proof-of-concept for geographically differentiated CAP reform.....	79
6.6 Regional exposure and implications for CAP reform	80
Chapter 7. General discussion	85
7.1 Introduction	85
7.2 Revisiting the five studies	86
7.2.1 Subsidy lock-ins along supply chains	86
7.2.2 Regional winners and losers of a plant-rich transition.....	87
7.2.3 Stranded assets in a plant-rich transition.....	87
7.2.4 Spatial disaggregation in IO models.....	88
7.2.5 Subnational subsidy dependence, labour exposure, and implications for tailored CAP reform.....	89
7.3 Cross-chapter synthesis and answer to the main research question	90
7.4 Limitations and future research.....	93
7.5 Policy implications	97
7.6 Conclusions.....	98
