# REWARDS

European Pain Federation – Fondazione IBSA publication award 2016 voor "Is the brain of complex regional pain syndrome patients truly different?"

Genomineerd voor landelijke "Chris Gips prijs" voor beste buitenlandse masterscriptie.

# DANKWOORD

Via dit dankwoord zou ik graag enkele mensen willen bedanken voor hun hulp bij het tot stand komen van dit proefschrift.

Ten eerste wil ik alle proefpersonen en met name de patiënten bedanken voor hun deelname aan mijn onderzoek. Uw inzet tijdens dit onderzoek is zeer lovenswaardig.

Bob van Hilten en Han Marinus ben ik heel veel dank verschuldigd. Niet eerder zal een promovendus jullie geduld zo op de proef hebben gesteld. Ook nadat de eerste resultaten tegenvielen en mijn artikelen op zich lieten wachten, bleven jullie mij steunen. Daarnaast prijs ik het enthousiasme en de grootse ideeën van Bob en de constructieve en zeer secure noot van Han. Jullie maken samen een goed team!

Er zijn ook veel collega's geweest die mij hielpen om de experimenten op een correcte manier uit te voeren. Specifiek wil ik bedanken Wouter Teeuwisse, Jeroen van der Grond, Serge Rombouts en Mark van Buchem. Zonder jullie hulp bij het uitvoeren en analyseren van de MRI-scans zou dit proefschrift nooit tot stand zijn gekomen. Van de afdeling klinische neurofysiologie wil ik specifiek Paul van Someren bedanken. Paul, dank voor je hulp en tips tijdens de TMS-EMG metingen, ook op tijdstippen waarop je eigenlijk druk bezig was met je klinische taken. Daarnaast wil ik Miriam van Gestel danken voor haar hulp met het gebruik van de CRPS-database en Erik van Zwet voor zijn hulp met de statistische analyses van meerdere onderzoeken.

Dank ook naar mijn oud-collega onderzoekers en AIOS. De goede sfeer die er heerste in de groep en jullie inspirerende successen waren altijd een extra drijfveer voor mij.

Mijn familie wil ik bedanken voor hun geduld. Jarenlang heb ik jullie, soms tegen beter weten in, moeten geruststellen dat het goed komt. Dank voor jullie begrip, jullie luisterend oor en steun.

Special thanks to Candy McCabe, currently professor at the University of the West of England, Bristol, United Kingdom. I took the first steps as a junior scientist under your excellent supervision in the latter half of 2009. Thank you for your help, your encouragements and above all for your boundless enthusiasm. You have been an inspiration to me!

Als laatste wil ik mijn lieve partner Janneke Schilder bedanken. Want een groot deel van dit proefschrift is geschreven in tijd die ik ook aan ons mooie gezin en aan jou had kunnen besteden. Dank voor je begrip en aanmoedigingen, zonder jouw steun was het nooit voltooid.

# CURRICULUM VITAE

Gijsbrecht Abraham Johan van Velzen was born on the 24th of May, 1984. After graduating high school (Stedelijk Gymnasium Leiden) in 2002, he studied Political Science at the University of Leiden for one year. In 2003 he was accepted at the medical school (University Leiden) which he completed in 2010. In his last year of medical school he attended a scientific internship in Bath, United Kingdom, under the supervision of Candy McCabe. In May 2010 he started his PhD research at the department of neurology in the Leiden University Medical Center, under the supervision of prof. J.J. van Hilten and dr. J. Marinus. This was followed up by one year of residency neurology-not-in-training (ANIOS) in the Reinier de Graaf Gasthuis. In July 2015 he started his residency neurology at the Leiden University Medical Center which he completed in October 2021. After two months as chef de clinique in Franciscus Gasthuis en Vlietland, he started as a neurologist in the Noord West Ziekenhuisgroep from the first of January 2022.

Gijsbrecht has a beautiful fiancé Janneke Schilder and three children (Klaas, Emma and Tijn).
