The authors regret that the abstract stated “One of the mutant receptors, namely S101P^{2.63} with a mutation near the orthosteric binding site, did not express on the cell surface”.

However, the correct statement should be “One of the mutant

receptors, namely P258L^{6.50} with a mutation near the allosteric binding site, did not express on the cell surface”.

The authors would like to apologise for any inconvenience caused.
